

Test Scenario Timeline and Review Plan

Digital STEM Content Delivery Platform

Project details

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	Test Scenario Timeline and Review Plan
Prepared By	Business Analyst
Version	1.0
Date	28 June 2026

1. Document Purpose

This document defines when test scenarios will be prepared, reviewed, executed and linked back to requirements during the Agile delivery of the Digital STEM Content Delivery Platform. It helps the Business Analyst, QA Tester, Developer Team, Scrum Master and Product Owner understand the testing timeline for Sprint 1, Sprint 2 and Sprint 3.

2. Document Inputs

This timeline is prepared using the approved Business Requirements Document, Functional Requirements Document, Non-Functional Requirements Document, Business Rules Document, Use Case Document, User Stories and Acceptance Criteria, Product Backlog and Sprint 1 Backlog.

3. Testing Timeline Summary

Phase / Sprint	Testing Activity	Owner	Expected Output
Sprint 0	Define test scenario planning approach from FRD, Business Rules, Use Cases and Acceptance Criteria.	Business Analyst / QA Tester	Test scenario timeline and review approach confirmed.
Sprint 1 Day 1	QA starts drafting test scenarios for login, role dashboard, approved library, filters and content details.	QA Tester	Draft Sprint 1 test scenarios.
Sprint 1 Day 2	Business Analyst reviews draft test scenarios against requirements and acceptance criteria.	Business Analyst / QA Tester	Reviewed test scenarios with corrections if needed.
Sprint 1 Day 3 onwards	QA executes test scenarios when Sprint 1 features are ready in test environment.	QA Tester	QA results and defects if any.
Sprint 1 End	BA functional review and Product Owner Sprint Review confirmation.	Business Analyst / Product Owner	Sprint 1 acceptance readiness.
Sprint 2	Prepare and execute test scenarios for Admin content management, approval workflow and classroom display mode.	QA Tester / Business Analyst	Sprint 2 QA results.
Sprint 3	Prepare UAT scenarios, support User Acceptance Testing and content validation.	Business Analyst / QA Tester / UAT Users	UAT results and release readiness.

4. Sprint 1 Test Scenario Timeline

Day	Activity	Owner	BA Involvement	Output
Day 1	QA reviews Sprint 1 stories and acceptance criteria.	QA Tester	Business Analyst confirms requirement clarity if questions come up.	QA understands Sprint 1 scope.
Day 1 to Day 2	QA drafts test scenarios for User Login, Role-Based Dashboard, Teacher Content Library, Filters, Content Details, Approved Content Visibility and No Matching Content Message.	QA Tester	Business Analyst checks coverage against FRD, Business Rules and Acceptance Criteria.	Draft Sprint 1 test scenarios.
Day 2	Test Scenario Review session.	Business Analyst / QA Tester	Business Analyst confirms expected behaviour and gaps.	Reviewed test scenarios ready for execution.

Day 3 to Day 7	QA executes test scenarios as features move to Ready for QA.	QA Tester	Business Analyst supports clarification and functional review.	QA execution results.
Day 8 to Day 9	Business Analyst performs functional review of completed Sprint 1 features.	Business Analyst	Check built behaviour against acceptance criteria.	BA functional review result.
Day 10	Sprint Review preparation and Product Owner confirmation.	Scrum Master / Product Owner	Business Analyst supports demo readiness and requirement traceability.	Sprint 1 review readiness.

5. Sprint 1 Test Coverage

Story ID	Story Name	Main Test Focus	Test Scenario Owner
S1-01	User Login	Valid login, invalid login, inactive account handling and login error message.	QA Tester
S1-02	Role-Based Dashboard	Correct dashboard options by role and restricted access for wrong role.	QA Tester
S1-03	View Approved Content Library	Teacher sees Approved content only. Draft, Under Review and Inactive content remain hidden.	QA Tester
S1-04	Filter Content by Class, Subject and Topic	Filter results by selected class, subject and topic.	QA Tester
S1-05	View Content Details	Teacher can open selected content details and view required metadata.	QA Tester
S1-06	Approved Content Visibility	System applies content status visibility rules correctly.	QA Tester
S1-07	No Matching Content Message	System shows clear message when filters return no records.	QA Tester

6. Test Scenario Review Checklist

Checklist ID	Review Check	Owner
TSR-01	Each Sprint 1 story has at least one positive test scenario.	QA Tester
TSR-02	Important negative scenarios are covered, such as invalid login and no matching content.	QA Tester
TSR-03	Teacher visibility rules are covered for Draft, Under Review, Approved and Inactive content.	Business Analyst / QA Tester
TSR-04	Acceptance criteria are traceable to test scenarios.	Business Analyst / QA Tester
TSR-05	Role-based access scenarios are included.	QA Tester

TSR-06	Test data requirement is identified before execution.	QA Tester / Business Analyst
TSR-07	Any unclear expected result is clarified before QA execution.	Business Analyst

7. Jira Comment Timeline for Testing

Situation	Should Jira Comment Be Added?	Reason
QA starts preparing test scenarios.	No	Normal sprint activity.
Business Analyst reviews test scenarios and confirms they are ready.	Yes	BA functional review point.
QA finds mismatch between acceptance criteria and system behaviour.	Yes	QA result or clarification needed.
QA completes Sprint 1 testing.	Yes	QA result is useful for tracking.
Daily status with no issue.	No	Avoid unnecessary Jira noise.
Product Owner confirms Sprint 1 acceptance.	Yes	Product Owner decision.

8. Sprint 2 and Sprint 3 Testing Timeline

Sprint	Testing Focus	When Prepared	When Executed
Sprint 2	Admin content management, content status workflow, approval workflow, classroom display mode and content launch error message.	During Sprint 2 Planning and Day 1 of Sprint 2.	As Sprint 2 features move to Ready for QA.
Sprint 3	Regression testing, UAT scenarios, content validation, release readiness and final business sign-off.	Before UAT starts in Sprint 3.	During UAT and release validation.

9. Assumptions

- QA Tester will prepare detailed test scenarios using user stories and acceptance criteria.
- Business Analyst will review test scenarios for requirement coverage and expected result clarity.
- Sample users and sample content records will be available before QA execution.
- Sprint 1 testing will focus only on Teacher login, content library and filters.
- Admin content management, approval workflow and classroom display mode testing will be handled in Sprint 2.

10. Dependencies

Dependency ID	Dependency	Owner
DEP-TS-01	Sprint 1 user stories and acceptance criteria must be available.	Business Analyst
DEP-TS-02	Sample Teacher, Admin and Principal login accounts must be available.	Developer Team / Product Owner
DEP-TS-03	Sample content records with Draft, Under Review, Approved and Inactive statuses must be available.	Content Team / Admin Staff
DEP-TS-04	Test environment must be available before execution.	Developer Team / QA Tester
DEP-TS-05	QA Tester must confirm test scenario coverage before execution.	QA Tester

11. Next Step

After this test scenario timeline is reviewed, the Business Analyst and QA Tester will prepare the Sprint 1 Test Scenario Review document and start Sprint 1 execution with clear testing checkpoints.
