Professional Summary

Business Analyst with hands-on experience in digital projects, reporting and process improvement across web, mobile, STEM and manufacturing environments. Experienced in gathering requirements, working with stakeholders, creating user stories, acceptance criteria, process flows, UAT evidence and reporting checks. Independently delivered the AutoInsight BA prototype covering website MVP journeys, SQL data structure and Power BI reporting. Comfortable using AI and BA tools such as ChatGPT, Claude AI, NotebookLM, n8n, Lucidchart, Power BI Copilot and Google Antigravity to support documentation, process mapping, prototyping, analysis and reporting tasks.

Professional Experience

Ckay Solution Limited, United Kingdom | Business Analyst | May 2026 - Present

- Delivered a 2-phase AutoInsight project covering website MVP, SQL data build and Power BI reporting, producing structured BA evidence across requirements, process flows, backlog, validation, UAT and closure.
- Defined and reviewed 8 website journeys and related form rules, including product categories, quote request, contact, feedback and newsletter flows, reducing ambiguity before development.
- Validated dashboard accuracy using SQL checks across 8 KPI cards and 4 key visuals, including enquiry source, quote value by category, lead pipeline status and monthly enquiry trend.
- Completed UAT evidence across 5 dashboard test scenarios, confirming filter behaviour, KPI visibility and dashboard usability before phase closure.

Career Break - MBA Studies & Professional Development | London, UK | Jan 2025 - April 2026

- Completed a general MBA at Middlesex University, London.
- Continued professional development through Agile, Business Analysis and technology consulting certifications.

FeelTech Digiviation Pvt Ltd, Gujarat, India | Business Analyst | Dec 2023 - Dec 2024

Project: Mobile/Web Application Development | Digital STEM Content Delivery Platform

- Elicited requirements for ABC School portfolio project using stakeholder collaboration, BRD and FRD, defining 10 scope items across Teacher Android and Admin web platforms.
- Structured Agile Scrum backlog in Jira with user stories, acceptance criteria and role-based access rules, supporting 4 sprint phases from discovery to UAT planning.
- Produced Confluence process maps, data fields, test scenarios and 21 UAT checklist items, improving QA alignment and Product Owner validation before release readiness.
- Executed requirements elicitation and stakeholder collaboration for a simulated Agile Scrum portfolio project, producing 23 Confluence-ready BA documents including BRD, FRD and process mapping.
- Structured Jira backlog with 18 PBIs, 12 user stories and acceptance criteria across Teacher mobile/web access, Admin content management and approval workflow scope.
- Validated Sprint 1 readiness using roadmap planning, wireframe review and UAT/test scenario timeline, aligning 4 roles and reducing delivery ambiguity before execution.

Jindal Stainless Ltd, Odisha, India | Associate Manager - Operations Analyst | Nov 2017 - Nov 2023

Project: SIEMAG Level 1 Upgrade & Primetals Process Explorer 2.0 Level 2 Automation

- **Process Automation-** Supported upgrade from manual SIEMAG HMI-based operations to semi-automated Level 1 and fully automated Level 2 workflows.
- **Technical Documentation-** Documented 20+ SOPs, OMS documents, process flows and technical work instructions to help teams use automated workflows.
- **UAT Support-** Tested Level 1 and Level 2 automation workflows in simulation before rollout, finding usability, process and data-tracking issues for correction.
- **KPI Analysis-** Analysed Level 2 process data, time-temperature graphs and operational KPIs, contributing to 4 minutes saved per cycle and 486 hours annual time savings.
- **Cost Savings-** Helped save approximately £0.57m per year in shop-floor time costs by improving transfer car movement across 20 daily production cycles.

- Reduced raw material waste by 1.68% through 5S implementation, raw material optimisation and process improvements.
- **Achievements:** 2021, Star Award for process optimisation and productivity improvement, IdeaChamp Award for quality improvement initiatives.

India Steel Works Ltd, Mumbai, India | Operation Executive | Mar 2016 - Nov 2017

- Conducted unit performance analysis and KPI tracking using Excel-based production data to support operational reporting and process review.
- Prepared benchmarking reports comparing actual results against historical data to find process improvement opportunities.
- Reviewed quality control activities, including OOS/non-conformance review, process variance checks and corrective action tracking.

Certifications & Professional Development

- **PwC US Technology Consulting Job Simulation with Forage:** Created a discovery workshop guide, business user stories, MVP roadmap, and executive summary for an ERP compliance and SOX controls system upgrade.
- Professional Certificate in Agile Project Management - Atlassian
- Business Analysis A to Z Masterclass - Udemy
- Business Analysis for Project Managers - International Institute of Business Analysis

Education

- **Master of Business Administration (MBA)** | Middlesex University, London, United Kingdom - Completed Feb 2026
 - **Bachelor of Technology, Metallurgy & Material Engineering** | National Institute of Technology, Srinagar, India
-
