Professional Summary

Business Analyst with hands-on experience in requirements gathering, stakeholder management, gap analysis, process mapping and digital change across web, mobile application, STEM and manufacturing automation environments. Skilled in translating business needs into functional requirements, business rules, user stories, acceptance criteria, process flows and UAT documentation. Experienced in Agile Scrum, Kanban, Jira, Confluence, As-Is/To-Be analysis and stakeholder workshops, with exposure to Target Operating Model principles and user adoption.

Key Skills & Tools

- **Business Analysis:** Requirements gathering, stakeholder interviews, SME collaboration, gap analysis, user stories, acceptance criteria, business rules, functional requirements and system requirements
 - **Technical BA:** SDLC, web application requirements, API integration awareness, system process documentation, data flow diagrams, user impact analysis and BDD-style acceptance criteria
 - **Process Modelling:** As-Is / To-Be process mapping, BPMN awareness, swimlane diagrams, flowcharts, process flows and workflow analysis
 - **Agile & Delivery:** Agile Scrum, Kanban, backlog refinement, sprint planning, MVP, change requests, requirement prioritization and handover support
 - **UAT & Documentation:** UAT scenarios, UAT packs, test validation, defect tracking awareness, regression testing awareness, BRD/FRD support and user support documentation
 - **Tools & Systems:** Jira, Confluence, Microsoft 365, Advanced Excel, Basic SQL, Basic Power BI, Basic Visio, Grafana, Kibana, Splunk, HMI systems and manufacturing process software
-

Professional Experience

Kcay Solution Limited, United Kingdom | Business Analyst | Client: Zytech Autoparts Ltd

Project: Company Website Development | May 2026 - Present

- Conducted stakeholder interviews to review Zytech website scope, target users, page needs, and enquiry journeys during discovery, helping developers and testers understand the build requirements clearly.
- Documented functional specifications, use cases, and detailed functional requirements for homepage, product/service, contact, and enquiry form pages, covering content, validation, and responsive design expectations.
- Drafted user stories, acceptance criteria and backlog items for core website features, clarifying page behaviour with developers and testers.
- Improved enquiry form usability by removing duplicate fields and defining clearer validation rules, reducing avoidable changes during early UAT review.
- Supported As-Is and To-Be process discussions with business users and technical teams, helping translate business needs into clear requirements, user stories, acceptance criteria and improved service workflows.

Career Break – MBA Studies & Professional Development | London, United Kingdom | Jan 2025 – April 2026

- Completed a general MBA at Middlesex University, covering strategy, innovation, marketing, finance, business strategy and leadership.
- Continued professional development through Agile, Business Analysis and technology consulting certifications.

FeelTech Digiviation Pvt Ltd, Gujarat, India | Business Analyst

Project: Mobile/Web Application Development | STEM Project | Dec 2023 - Dec 2024

- Collected requirements for education mobile applications used by schools and institutes, helping improve student, teacher and admin workflows.
- Led discovery discussions to understand student journeys, teacher workflows, academic reporting needs and administrative processes.
- Captured requirements for 8+ modules, including attendance, assignments, unit tests, schedules, course content, notifications and reports.
- Created 25+ user stories, business rules and acceptance criteria for mobile app features, making requirement clearer for developers and testers.
- Prepared UAT scenarios for 8+ education workflows, reducing repeat UAT clarification by 20% through clearer acceptance criteria and test documentation.

Jindal Stainless Ltd, Odisha, India | Associate Manager - Operations Analyst

Project: SIEMAG Level 1 Upgrade & Primetals Process Explorer 2.0 Level 2 Automation | Nov 2017 - Nov 2023

- **Process Automation-** Supported upgrade from manual SIEMAG HMI-based operations to semi-automated Level 1 and fully automated Level 2 workflows.
- **Technical Documentation-** Documented 20+ SOPs, OMS documents, process flows and technical work instructions to help teams use automated workflows.
- **UAT Support-** Tested Level 1 and Level 2 automation workflows in simulation before rollout, finding usability, process and data-tracking issues for correction.
- **KPI Analysis-** Analysed Level 2 process data, time-temperature graphs and operational KPIs, contributing to 4 minutes saved per cycle and 486 hours annual time savings.
- **Cost Savings-** Helped save approximately £0.57m per year in shop-floor time costs by improving transfer car movement across 20 daily production cycles.
- Reduced raw material waste by 1.68% through 5S implementation, raw material optimisation and process improvements.
- **Achievements:** 2021, Star Award for process optimisation and productivity improvement, Idea Champ Award for quality improvement initiatives.

India Steel Works Ltd, Mumbai, India | Operation Executive | Mar 2016 - Nov 2017

- Conducted unit performance analysis and KPI tracking using Excel-based production data to support operational reporting and process review.
 - Prepared benchmarking reports comparing actual results against historical data to find process improvement opportunities.
 - Reviewed quality control activities, including OOS/non-conformance review, process variance checks and corrective action tracking.
-

Certifications & Professional Development

- **PwC US Technology Consulting Job Simulation with Forage:** Created a discovery workshop guide, business user stories, MVP roadmap, and executive summary for an ERP compliance and SOX controls system upgrade.
 - Professional Certificate in Agile Project Management - Atlassian
 - Business Analysis A to Z Masterclass - Udemy
 - Business Analysis for Project Managers – International Institute of Business Analysis
-

Education

- **Master of Business Administration (MBA) |** Middlesex University, London, United Kingdom - Completed Feb 2026
 - **Bachelor of Technology, Metallurgy & Material Engineering |** National Institute of Technology, Srinagar, India
-
