

RACI Matrix

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Client Name	Auto Parts SME
Prepared By	Business Analyst
Document Type	RACI Matrix
Sprint	Sprint 0 Discovery Initiation
Working Date	12 May 2026
Linked Jira Task	Prepare RACI Matrix

1. Purpose

The purpose of this RACI Matrix is to define clear ownership for key activities in the Auto Parts SME website project. RACI means Responsible, Accountable, Consulted, and Informed. The document helps the delivery team understand who does the work, who approves it, who gives input, and who needs updates.

2. RACI Definitions

R - Responsible	Person or role doing the work.
A - Accountable	Person or role who owns the final decision or approval.
C - Consulted	Person or role who provides input before the decision or completion.
I - Informed	Person or role who needs progress updates or final information.
Project note	For this small website project, one role may hold more than one responsibility where practical.

3. Key Project Roles

Role	Project Responsibility
Business Owner / Product Owner	Owns business decisions, confirms priorities, approves scope, content direction, User Acceptance Testing sign-off, and release readiness.
Business Analyst	Captures requirements, prepares BA documents, supports backlog creation, clarifies business rules, supports User Acceptance Testing, and keeps requirements traceable.
Scrum Master	Facilitates Agile ceremonies, supports sprint planning, removes delivery impediments, and helps the team follow agreed ways of working.
Sales / Enquiry Handling Team	Provides input on current customer enquiry process, quote request data needs, follow-up process, and practical sales handling steps.
Content Owner	Provides and confirms website content, product category wording, footer content, contact information text, and approved customer-facing claims.
UI/UX Designer	Prepares or reviews user interface and user experience layout for homepage, navigation, forms, product categories, and responsive design.
Website Developer	Builds the website pages, forms, email notification behaviour, responsive layout, and agreed technical changes.
QA Tester	Tests functional behaviour, form validation, responsiveness, basic accessibility checks, and supports defect reporting if needed.
Compliance / Legal Advisor, if available	Reviews or advises on privacy notice, cookie notice, terms wording, delivery or returns wording, and customer-facing claims where needed.

4. RACI Matrix

The table below shows ownership for the main Sprint 0 and Phase 1 preparation activities. It is written in a simple role-based format so it can be used in Jira, Confluence, and stakeholder discussions.

Activity	Responsible	Accountable	Consulted	Informed
Confirm project objective and Phase 1 scope	Business Analyst	Business Owner / Product Owner	Scrum Master, Website Developer	Delivery Team
Prepare Project Intake Note	Business Analyst	Business Owner / Product Owner	Scrum Master	Delivery Team

Coordinate User Acceptance Testing	Business Analyst	Business Owner / Product Owner	QA Tester, Website Developer	Scrum Master
Confirm release readiness	Scrum Master, Business Analyst	Business Owner / Product Owner	Website Developer, QA Tester, Compliance / Legal Advisor if available	Delivery Team

5. Compliance Ownership Note

The Business Analyst identifies compliance-related requirements and captures them in Jira and Confluence. The Business Analyst does not provide legal advice.

Privacy notice, cookie notice, newsletter consent, unsubscribe option, company information, delivery or returns wording, and customer-facing claims must be confirmed by the Business Owner or relevant advisor before go-live.

Claims such as free shipping, money back, secure payment, discount, or 24/7 support should not be treated as final website content until confirmed by the business.

6. Assumptions

The project is a small website delivery project with one delivery team and multiple roles.

The Business Owner and Product Owner responsibility may be handled by the same person in this small company project.

A compliance or legal advisor may not be part of every meeting, but compliance review ownership should still be confirmed before release.

SQL and Power BI reporting activities are not part of Phase 1 RACI. They will be handled in Phase 2 future enhancement documents.

7. Next Step

Use this RACI Matrix during discovery planning and stakeholder discussions. The next BA activity is to prepare Discovery Questions for the Business Owner, Sales / Enquiry Handling Team, Content Owner, and compliance-related confirmations.

8. Portfolio Evidence Note

This document can be saved as BA portfolio evidence. Screenshots of Jira and Confluence can also be saved after removing any identifiable client details and using Auto Parts SME as the client name.
