

Business Requirements Document (BRD)

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Field	Value
Client Name	Auto Parts SME
Prepared By	Business Analyst
Document Date	18 May 20xx
Sprint	Sprint 1
Version	v1.0
Document Status	Draft for Product Owner and Business Owner review
Confidentiality Note	Anonymised portfolio evidence. No identifiable client details included.

1. Purpose

This Business Requirements Document (BRD) captures the high-level business requirements for the Phase 1 website MVP for Auto Parts SME. The BRD defines what the business needs, why it is needed, what is included in Phase 1, what is excluded, and which compliance areas must be confirmed before release.

2. Business Background

Auto Parts SME currently receives customer enquiries through manual channels such as phone calls, WhatsApp messages, email enquiries, and informal product questions. The business wants a professional official website that allows customers to view company information, browse auto parts categories, request a quote, contact the business, provide feedback, and subscribe to updates.

3. Business Problem

- Customer enquiries are currently received through multiple informal channels.
- Customer details are not captured in a consistent format.
- Follow-up is manual and may depend on chat history, email threads, notes, or memory.
- Customers do not have a single official website journey to understand the business and submit enquiries.
- The business has limited structured enquiry information for future sales lead tracking.

4. Business Objectives

- Create a professional official website for Auto Parts SME.
- Provide clear company and service information to customers.
- Allow customers to browse product or featured auto parts categories.
- Allow customers to submit quote requests through a structured form.
- Allow customers to contact the business and submit feedback.
- Include newsletter subscription with consent and unsubscribe consideration.

- Support mobile responsive access for customers using desktop, tablet, and mobile devices.
- Prepare the business for possible Phase 2 enquiry and sales lead reporting using SQL and Power BI.

5. Phase 1 Scope

Scope Area	Business Requirement Summary
Home Page	Hero banner, call-to-action, trust/service cards, product category preview, promotional/recommendation area.
About Us Page	Company background, business purpose, service approach, and customer-facing information.
Product / Featured Categories	Category sections such as body parts, lighting, engines, differential, electrical, and gearbox.
Request a Quote Form	Structured enquiry form with customer contact details, vehicle/product details, and message field.
Contact Us Page	Contact form and general business contact information area using anonymised content in portfolio version.
Feedback Form	Simple customer feedback submission form.
Newsletter Subscription	Email subscription section with consent and unsubscribe consideration.
Footer Links	Customer service links, company links, legal links, and newsletter area.
Legal / Information Pages	Privacy Policy, Cookie Policy, Terms and Conditions, Delivery / Returns information.
Responsive Design	Desktop, tablet, and mobile layout support.
Basic SEO	Page titles, meta descriptions, headings, alt text, and readable content structure.
Email Notification	Business receives email notification when quote/contact forms are submitted.
UAT and Release Readiness	Business review, UAT, sign-off, and go-live checklist.

6. Phase 1 Out of Scope

- Customer login or customer account dashboard.
- Online payment gateway or full e-commerce checkout.
- Live inventory management.
- Complex admin portal.
- Mobile application.
- API integration.
- SQL and Power BI dashboard delivery.
- Advanced product recommendation engine.

7. High-Level Business Requirements

Req ID	Business Requirement
BR-01	The website shall provide a professional homepage explaining the business and directing customers to request a quote.
BR-02	The website shall provide an About Us page to present approved company information.
BR-03	The website shall display product or featured auto parts categories agreed by the business.
BR-04	The website shall provide a Request a Quote form to capture customer and product requirement details.
BR-05	The website shall provide a Contact Us page for general enquiries.
BR-06	The website shall provide a Feedback form for customer comments.
BR-07	The website shall allow customers to subscribe to updates using a newsletter subscription option.
BR-08	The website shall include footer links for customer service, company information, and legal pages.
BR-09	The website shall include Privacy Policy, Cookie Policy, Terms and Conditions, and Delivery / Returns pages.
BR-10	The website shall be responsive across desktop, tablet, and mobile devices.
BR-11	The website shall include basic SEO requirements agreed during Sprint 1.
BR-12	The website shall send email notification to the business when quote or contact forms are submitted.
BR-13	The business shall confirm customer-facing claims before they are used on the website.
BR-14	The website shall support UAT before go-live.
BR-15	Phase 2 reporting using SQL and Power BI shall remain future scope and not be delivered in Phase 1.

8. Stakeholders and Approval

Stakeholder / Role	Main Interest or Approval Area
Business Owner	Business scope, content approval, claims approval, go-live approval.
Product Owner	Backlog priority, MVP scope, acceptance of requirements.
Sales / Enquiry Handling Team	Quote form fields, enquiry handling process, follow-up needs.
Business Analyst	Requirements capture, documentation, scope clarity, acceptance criteria, UAT support.
Scrum Master	Sprint planning support, delivery coordination, ceremonies, impediment visibility.
UI/UX Designer	Wireframes, page layout, user journey, responsive design.
Website Developer	Website implementation, forms, email notification, page build.
QA Tester	Testing, defect reporting, test evidence.
Compliance / Legal Advisor if available	Review of legal/compliance wording where required.

9. Compliance and Regulatory Considerations

The following are BA-level compliance considerations. This document does not provide legal advice. Final wording and legal interpretation must be confirmed by the Business Owner or relevant advisor.

- Privacy notice is required because forms collect personal data such as name, email, phone number, vehicle details, and enquiry message.
- Cookie notice and cookie preference requirement should be confirmed if analytics, non-essential cookies, advertising cookies, or tracking tools are used.
- Newsletter subscription should include clear consent and unsubscribe consideration.
- Company information and legal page requirements should be confirmed by the business owner or relevant advisor.
- Delivery / Returns information should be included as customer information and reviewed if online selling is added in future.
- Customer-facing claims such as free shipping, secure payment, money back, discounts, and support availability must be confirmed before use.
- Basic accessibility should be considered, including readable contrast, keyboard navigation, alt text, form labels, error messages, and mobile-friendly layout.

10. Success Criteria

- Customers can access key company and service information through the website.
- Customers can browse product or featured auto parts categories.
- Customers can submit a structured Request a Quote form.
- The business receives quote/contact enquiries by email notification.
- Legal and customer information pages are included and reviewed before go-live.
- Website layout is responsive on desktop, tablet, and mobile devices.
- Business Owner or Product Owner completes UAT sign-off before go-live.

11. Assumptions

- The business will provide approved content and product category information.
- The business will confirm form fields needed for enquiry handling.
- The business will confirm which customer-facing claims are true and approved.
- Phase 1 will use email notification instead of a full database-driven admin portal.
- Phase 2 SQL and Power BI reporting will be planned separately after Phase 1 go-live.

12. Risks and Mitigation

Risk	Possible Impact	Mitigation
Delayed content approval	Page build or review may be delayed.	Assign content owner and agree content review date.
Unclear quote form fields	Incomplete enquiry capture.	Confirm required fields with Sales / Enquiry Handling Team.
Unconfirmed	Go-live approval may be	Track compliance items early and

compliance wording	delayed.	request business/advisor review.
Unapproved marketing claims	Customer trust or compliance risk.	Use only claims confirmed by Business Owner.
Mobile layout issues	Poor customer experience on mobile.	Include responsive design review and UAT checks.

13. Dependencies

- Approved business content and product/category information.
- Business confirmation of form fields and enquiry handling process.
- UI/UX wireframes based on sitemap and backlog.
- Developer capacity for website pages, forms, email notification, and responsive layout.
- QA availability for functional and responsive testing.
- Business Owner or Product Owner availability for UAT and sign-off.

14. Phase 2 Future Enhancement Note

Phase 2 may include a Customer Enquiry and Sales Lead Tracking Dashboard using SQL and Power BI. This is not part of Phase 1 delivery. Phase 2 may cover enquiry data structure, lead status, follow-up notes, enquiry source tracking, SQL validation, and Power BI dashboard requirements.
