

Business Rules Document

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Client Name	Auto Parts SME
Prepared By	Business Analyst
Date	19 May 20xx
Sprint	Sprint 1 Website Foundation
Version	v1.0
Document Status	Draft for review

1. Purpose

The purpose of this Business Rules Document is to capture the key rules that control how the official website and customer enquiry process should operate for Auto Parts SME.

These rules support the Business Requirements Document (BRD), Functional Requirements Document (FRD), Non-Functional Requirement (NFR) document, user stories, acceptance criteria, test scenarios, and User Acceptance Testing (UAT).

2. Scope of Business Rules

The rules in this document apply to Phase 1 website delivery only. Phase 1 includes website pages, customer enquiry forms, newsletter subscription, legal and footer pages, responsive design, basic SEO, email notification, testing, UAT, and release readiness.

Customer login, online payment, full checkout, live inventory, complex admin portal, API integration, SQL dashboard, and Power BI dashboard are out of scope for Phase 1.

3. Rule Categories

- Website navigation and page access rules
- Form submission and validation rules
- Customer enquiry handling rules
- Content and claim approval rules
- Newsletter and consent rules
- Legal and compliance confirmation rules
- Testing, UAT, and release readiness rules
- Phase 2 future enhancement boundary rules

4. Business Rules

Rule ID	Area	Business Rule	Owner / Accountable Role	Validation Note
BR-001	Scope	Phase 1 must deliver the official website and customer enquiry capability only. Online payment, customer login, live inventory, SQL dashboard, and Power BI dashboard must not be included in Phase 1 delivery.	Product Owner / Business Owner	Check against Product Backlog and release scope.
BR-002	Website Navigation	Header navigation must allow users to access Home, About Us, Contact Us, Feedback, and Request a Quote from the website pages where navigation is available.	Product Owner	Verify navigation links during functional testing.
BR-003	Product Categories	Product categories must be displayed using business-approved category names only, such as body parts, lighting, engines, differential, electrical, and gearbox where confirmed by the business.	Business Owner / Content Owner	Validate category names against approved content.
BR-004	Request a Quote Form	The Request a Quote form must collect enough information for the business to review the enquiry, including customer name, email or phone, product/category requirement,	Business Analyst / Product Owner	Confirm fields through Data Field List and FRD.

		vehicle or part details where applicable, and message.		
BR-005	Required Fields	Required fields must be clearly marked on customer-facing forms and the website must prevent submission when required fields are missing.	Business Analyst / Developer	Check form validation during test scenario review.
BR-006	Validation Error Message	If a required field is missing or format is invalid, the website must show a clear error message and allow the customer to correct the details before submission.	Business Analyst / QA Tester	Validate through functional testing.
BR-007	Confirmation Message	After successful form submission, the customer must receive a website confirmation message that the enquiry has been submitted.	Product Owner	Confirm message on successful submission.
BR-008	Email Notification	The business must receive an email notification when a Request a Quote or Contact form is successfully submitted.	Developer / Business Owner	Test email notification delivery during QA and UAT.
BR-009	Manual Follow-up	In Phase 1, business follow-up with customers remains manual through email, phone, WhatsApp, or preferred contact method agreed by the business.	Business Owner / Sales Team	Reflect manual follow-up in To-Be Process Flow.
BR-010	Newsletter Consent	Newsletter subscription must	Business Owner / Relevant Advisor	Confirm consent wording before

		require clear customer consent before the email address is used for marketing updates.		release.
BR-011	Unsubscribe	Newsletter or marketing email process must include an unsubscribe option or clear way to opt out.	Business Owner / Relevant Advisor	Confirm before go-live.
BR-012	Privacy Notice	Forms that collect personal data must have privacy information available through a visible Privacy Policy link.	Business Owner / Relevant Advisor	Confirm final privacy wording before release.
BR-013	Cookie Notice	If analytics, tracking, advertising, or non-essential cookies are used, the website must include a cookie notice and preference approach confirmed by the business.	Business Owner / Relevant Advisor	Confirm analytics and cookie requirement before release.
BR-014	Legal and Footer Pages	Footer must provide access to agreed customer service and legal information pages, including Privacy Policy, Cookie Policy, Terms and Conditions, and Delivery / Returns information.	Product Owner / Content Owner	Verify footer links during testing.
BR-015	Customer-facing Claims	Claims such as free shipping, secure payment, money back, discount, 24/7 support, or guarantee must not be displayed	Business Owner / Content Owner	Content owner to approve final claim list.

		unless confirmed by the Business Owner and supported by appropriate terms.		
BR-016	Payment Claim	Secure payment wording or payment icons must not imply online payment is available in Phase 1 unless the business confirms payment functionality and terms. Online payment is currently out of scope.	Business Owner / Product Owner	Remove or revise unsupported payment claims.
BR-017	Accessibility Basics	Website pages and forms should support readable text, clear labels, keyboard-friendly navigation, visible error messages, alt text for important images, and mobile-friendly layout.	Product Owner / UI/UX Designer / QA Tester	Check during UI/UX review and testing.
BR-018	Content Approval	Business-approved content must be received before final release, including company overview, product category text, legal page content, footer text, and claim wording.	Business Owner / Content Owner	Track content approval before release readiness.
BR-019	UAT Sign-off	User Acceptance Testing must be completed and signed off by the Product Owner or Business Owner before go-live.	Product Owner / Business Owner	Capture UAT sign-off evidence.
BR-020	Phase 2 Boundary	SQL and Power BI reporting	Product Owner / Business Analyst	Check backlog separation

		requirements may be captured as future enhancement only and must not be treated as Phase 1 delivery scope.		between Phase 1 and Phase 2.
--	--	--	--	------------------------------

5. Rule Ownership Notes

- Business Analyst documents and tracks business rules but does not approve legal or compliance wording.
- Business Owner or relevant advisor confirms privacy, cookie, newsletter, legal page, delivery/returns, and claim wording.
- Product Owner confirms rule priority and whether rules are included in Phase 1 or deferred.
- Developer and QA Tester use these rules to support build and test validation.
- UI/UX Designer uses these rules to support form, navigation, error message, and accessibility review.

6. Assumptions

- Auto Parts SME will provide approved content before release readiness.
- Phase 1 will not include online payment, customer login, live inventory, or complex admin portal.
- Email notification will be the primary enquiry alert mechanism in Phase 1.
- Business follow-up remains manual in Phase 1.
- Phase 2 SQL and Power BI reporting will be handled as future enhancement after website go-live.

7. Risks and Mitigation

Risk	Impact	Mitigation
Unapproved content or claims are added to the website.	Customer trust or compliance concern before go-live.	Content Owner and Business Owner approval required before release.
Form fields are not confirmed with enquiry handling team.	Customer enquiries may miss important details.	Data Field List and form requirements to be reviewed in Sprint 2.
Privacy or cookie wording is delayed.	Release readiness may be delayed.	Track compliance wording as a release readiness dependency.
Phase 2 reporting expectations enter Phase 1 scope.	MVP scope may expand and delay delivery.	Keep SQL and Power BI requirements as future enhancement only.

8. Traceability

These business rules will be used later to support Functional Requirements Document updates, user stories, acceptance criteria, test scenarios, User Acceptance Testing (UAT), and release readiness checks.
