

Product Category Requirements

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Field	Value
Client Name	Auto Parts SME
Prepared By	Business Analyst
Working Date	21 May 20xx
Sprint	Sprint 2 - Product Categories and Enquiry Forms
Document Version	v1.0
Confidentiality	Anonymised BA portfolio evidence. No identifiable client details included.

1. Purpose

This document captures the product category requirements for the Phase 1 website. It defines how product categories should be shown to customers, what category content is needed, what customer actions should be available, and what business approvals are required before publishing.

2. Scope of This Document

- Product / Featured Categories section on the website.
- Category card content and call-to-action behaviour.
- Category labels and example category wording.
- Business approval of category names, descriptions, and images.
- Out-of-scope items such as live stock, pricing, checkout, payment, and customer login.

3. Product Category Requirement Summary

Req ID	Category	Requirement	Acceptance Check	Owner
PC-01	Body Parts	Show body parts as a visible product category.	Category card should include title, short description, relevant image/icon, and Request a Quote action.	Business Owner / Product Owner
PC-02	Lighting	Show lighting parts as a visible product category.	Category card should help customer identify that lighting enquiries can be submitted.	Business Owner / Product Owner
PC-03	Engines	Show engines as a product category.	Wording must avoid confirming availability unless business confirms it.	Business Owner / Product Owner
PC-04	Differential	Show differential as a product category.	Category name and spelling must be confirmed by business before go-live.	Business Owner / Product

				Owner
PC-05	Electrical	Show electrical parts as a product category.	Category card should not promise compatibility unless confirmed by business.	Business Owner / Product Owner
PC-06	Gearbox	Show gearbox as a product category.	Category card should link customer to quote request instead of showing online purchase option.	Business Owner / Product Owner

4. Category Card Requirements

Rule ID	Requirement	Acceptance Check
CCR-01	Each category card must show category name clearly.	Customer can identify the category without confusion.
CCR-02	Each category card should include a short description or supporting text.	Description is clear, simple, and approved by the business.
CCR-03	Each category card should include relevant visual support such as image or icon.	Image/icon is not misleading and does not include real client branding.
CCR-04	Each category should include a Request a Quote call-to-action or route to enquiry.	Customer can move from category interest to enquiry submission.
CCR-05	No category card should show price, stock level, or guaranteed availability in Phase 1.	No live inventory or online selling behaviour is introduced.
CCR-06	Category section should work on desktop, tablet, and mobile.	Cards should stack or resize properly on smaller screens.

5. Category Behaviour Requirements

ID	Behaviour	Acceptance Check
CB-01	Customer views product categories from homepage or product/category section.	Categories are visible and easy to find from the homepage.
CB-02	Customer selects or reviews a category.	Customer understands what type of parts the business can receive enquiries for.
CB-03	Customer can proceed to Request a Quote.	Request a Quote button or link is available from category section.
CB-04	Selected category may be captured manually or passed into quote form if agreed.	If category pre-selection is used, it should match approved category values.
CB-05	Business team receives category information in enquiry where available.	Category helps business understand the enquiry before follow-up.

6. Content and Approval Requirements

- Business Owner or Product Owner must confirm the final product category names.
- Content Owner must provide approved short descriptions for each category.
- Images or icons must be generic, licensed, approved, and free from identifiable client branding if used in portfolio evidence.
- Any category wording must avoid unsupported claims such as guaranteed availability, best price, same-day delivery, or secure payment unless confirmed by the business.
- Category content should support basic Search Engine Optimisation (SEO), but should remain accurate and not misleading.

7. Out of Scope for Phase 1

- Live inventory management.
- Online product pricing.
- Add to cart or checkout.
- Online payment gateway.
- Customer login or account dashboard.
- Product recommendation engine.
- API integration with stock or supplier systems.
- SQL and Power BI dashboard delivery.

8. Compliance and Risk Notes

Area	BA Note	Confirmation Owner
Customer-facing claims	Claims like free shipping, discount, secure payment, money back, or 24/7 support must be confirmed before publishing.	Business Owner / relevant advisor
Images and content	Images should be approved, appropriate, and not misleading.	Content Owner / Business Owner
Privacy	If category selection is captured in a form with customer details, privacy notice should explain data collection at a suitable level.	Business Owner / relevant advisor
Accessibility	Category cards should support readable contrast, alt text, keyboard navigation, and mobile-friendly layout.	UI/UX Designer / Developer / QA
Accuracy	Category names should reflect what the business can realistically handle as enquiries.	Business Owner / Sales Team

9. Dependencies

- Approved category names from Business Owner or Product Owner.
- Approved category descriptions from Content Owner.
- Approved imagery or icons from UI/UX Designer or Content Owner.
- Figma category layout review before development finalisation.
- Request a Quote form requirement confirmation in Sprint 2.

10. Acceptance Criteria

- Product categories are listed and approved by the business.
- Category card requirements are documented.
- Phase 1 exclusions such as pricing, checkout, live inventory, and payment are clearly stated.
- Category-to-quote journey is defined.
- Compliance and claim validation notes are captured.
- Requirements are ready to support Sprint 2 user stories and acceptance criteria.

11. Portfolio Evidence Note

This document can be saved as anonymised BA portfolio evidence. All identifiable client information must be removed or replaced with Auto Parts SME before uploading to a public portfolio website.
