

SEO Requirement Notes

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Field	Value
Client Name	Auto Parts SME
Prepared By	Business Analyst
Document Date	20 May 20xx
Sprint	Sprint 1 - Website Foundation
Project Phase	Phase 1 Website MVP
Document Status	Draft for Business Review

1. Purpose

This document captures basic Search Engine Optimisation (SEO) requirements for the Phase 1 website MVP. The objective is to make the website structure, page content, headings, metadata, and customer-facing information suitable for basic search visibility while keeping the scope realistic for a small UK auto parts business.

2. Scope of SEO Requirements

In scope for Phase 1	Out of scope for Phase 1
Page titles and meta descriptions for main pages	Advanced SEO campaign or paid advertising
Basic keyword alignment for auto parts categories	Technical SEO audit using paid tools
Clean page headings and content hierarchy	Backlink strategy or off-page SEO work
Readable URLs for pages and categories	Content marketing calendar
Image alt text for key website images	Advanced schema implementation beyond basic needs
Mobile-friendly and fast-loading page expectation	Full SEO performance dashboard

3. SEO Requirement Summary

ID	Requirement	BA Notes
SEO-01	Each main website page should have a clear page title.	Home, About Us, Product Categories, Request a Quote, Contact Us, Feedback, Privacy Policy, Cookie Policy, Terms and Conditions, Delivery / Returns.
SEO-02	Each main page should have a short meta description.	Meta description should describe the page purpose in simple language and avoid unsupported claims.
SEO-03	Headings should follow a logical structure.	One main H1 per page, followed by H2/H3 sections where required.
SEO-04	Product categories should use business-approved category names.	Example categories: Body Parts, Lighting, Engines, Differential, Electrical, Gearbox.
SEO-05	Images should include meaningful alt text.	Alt text should describe the image and not include keyword stuffing.
SEO-06	URLs should be readable and aligned with page purpose.	Example: /request-a-quote, /contact-us, /product-categories.
SEO-07	Homepage content should clearly explain the business purpose.	Content should explain what the business offers and guide customers to request a quote.
SEO-08	Legal and customer service pages should be reachable from the footer.	Privacy Policy, Cookie Policy, Terms and Conditions, Delivery / Returns.
SEO-09	Website should be mobile responsive.	Mobile usability supports customer experience and basic search readiness.
SEO-10	Basic analytics may be added only if	If analytics uses non-essential cookies, cookie notice

	agreed by stakeholder.	and preference requirement should be confirmed.
--	------------------------	---

4. Suggested Page Metadata

Page	Suggested Page Title	Suggested Meta Description
Home	Auto Parts SME Quality Auto Parts Enquiries	Official website for Auto Parts SME. Customers can browse auto parts categories and request a quote.
About Us	About Auto Parts SME	Learn about Auto Parts SME and its auto parts enquiry support for customers.
Product Categories	Auto Parts Categories	Browse auto parts categories including body parts, lighting, engines, electrical parts, differential and gearbox.
Request a Quote	Request a Quote for Auto Parts	Submit your auto parts enquiry with contact, vehicle and part details for business follow-up.
Contact Us	Contact Auto Parts SME	Contact Auto Parts SME for business enquiries and customer support.
Feedback	Customer Feedback	Submit feedback about your enquiry or customer experience.
Privacy Policy	Privacy Policy	Information about how customer enquiry data is collected and used.
Cookie Policy	Cookie Policy	Information about cookies and tracking preferences if used on the website.
Terms and Conditions	Terms and Conditions	Website terms and customer information for Auto Parts SME.
Delivery / Returns	Delivery and Returns Information	Delivery, returns and related customer information, subject to business confirmation.

5. Content and Keyword Notes

The website should use natural, customer-friendly wording. Keywords should support clarity, not make the content look artificial. The BA should confirm product category wording with the Business Owner and Sales / Enquiry Handling Team before the content is approved.

- Use clear category names such as Body Parts, Lighting, Engines, Differential, Electrical, and Gearbox only after business confirmation.
- Use simple call-to-action wording such as Request a Quote, Contact Us, and Submit Enquiry.
- Avoid unsupported claims such as cheapest, guaranteed lowest price, secure payment, free shipping, money back, or 24/7 support unless approved by the Business Owner.
- Keep content short and useful for customers. The website is an enquiry-based MVP, not a full e-commerce store in Phase 1.

6. Accessibility and SEO Alignment

Area	Requirement
Alt text	Key images should have meaningful alt text that describes the image purpose.
Headings	Headings should be clear and used in proper order.
Links	Link text should be meaningful, for example Request a Quote instead of Click Here.
Forms	Form labels should be clear and error messages should guide the customer.
Mobile	Content should be readable on mobile without horizontal scrolling.
Contrast	Text should have readable contrast against the background.

7. Compliance and Approval Notes

SEO content must not create compliance or customer trust issues. The BA should track the following points for business confirmation before publishing:

- Company information shown on the website and footer.
- Privacy Policy wording for enquiry, contact, feedback, and newsletter forms.
- Cookie Policy and cookie preference need if analytics or non-essential cookies are used.
- Newsletter consent and unsubscribe wording.
- Delivery / Returns wording and whether it applies in Phase 1 or future online selling.
- Customer-facing claims such as free shipping, secure payment, money back, discounts, or support availability.

This document is prepared from a Business Analyst perspective and does not provide legal advice. Final wording should be confirmed by the Business Owner or relevant advisor.

8. Acceptance Criteria for SEO Readiness

- Main website pages have agreed page titles and meta descriptions.
- Homepage and category content are aligned with approved business wording.
- Footer includes links to required legal and customer information pages.
- Images used in key sections have meaningful alt text.
- Page headings are structured clearly for users and search engines.
- Unsupported claims are removed or approved by the Business Owner.
- Analytics requirement is confirmed before any tracking or cookie-related implementation.
- SEO notes are available for UI/UX, development, content review, and testing activities.
