

Use Case Document

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Field	Details
Client Name	Auto Parts SME
Prepared By	Business Analyst
Working Date	22 May 20xx
Sprint	Sprint 2 Product Categories and Enquiry Forms
Document Version	v1.0
Confidentiality	Anonymised BA portfolio evidence. No real client name, domain, logo, address, phone number, or email included.

1. Purpose

This Use Case Document describes the main interactions between website users and the Auto Parts SME website during Phase 1. It supports functional requirements, user stories, acceptance criteria, test scenarios, and User Acceptance Testing (UAT).

2. Scope

The use cases cover customer-facing website actions and basic business team enquiry handling. The Phase 1 website does not include customer login, online payment, full checkout, live inventory, customer dashboard, API integration, SQL dashboard, or Power BI dashboard.

Area	Details
In Scope	Browse product categories, submit Request a Quote form, submit Contact Us form, submit Feedback form, subscribe to newsletter, receive confirmation message, and send email notification to business.
Out of Scope	Customer login, online payment, checkout, live inventory, complex admin portal, mobile app, API integration, SQL dashboard, Power BI dashboard, and automated lead tracking.
Future Scope	Phase 2 may include Customer Enquiry and Sales Lead Tracking Dashboard using SQL and Power BI.

3. Actors

Actor	Role in Use Cases
Customer / Website Visitor	Visits the website, browses categories, submits enquiries, sends feedback, or subscribes to newsletter.
Business Team	Receives email notification, reviews enquiry details, checks product/vehicle information, and follows up manually.
Business Owner / Product Owner	Confirms scope, content, compliance wording, form fields, and business rules.
Website / Form System	Displays pages, validates required fields, shows confirmation/error messages, and sends email notifications.

4. Use Case Summary

ID	Use Case	Primary Actor	Short Description
UC-01	Browse Product Categories	Customer	Customer views available product categories and selects relevant category for enquiry.
UC-02	Submit Request a Quote Form	Customer	Customer submits structured quote request using required form fields.
UC-03	Submit Contact Us Form	Customer	Customer sends a general contact message to the business.

UC-04	Submit Feedback Form	Customer	Customer shares feedback about service, website, or enquiry experience.
UC-05	Subscribe to Newsletter	Customer	Customer subscribes to receive future updates with clear consent.
UC-06	Receive and Review Enquiry Notification	Business Team	Business receives email notification and reviews submitted enquiry details.

5. Detailed Use Cases

UC-01: Browse Product Categories

Item	Description
Primary Actor	Customer / Website Visitor
Trigger	Customer wants to understand what auto parts categories are available.
Pre-condition	Website is accessible and product category section is available.
Main Flow	1. Customer visits website. 2. Customer opens product category section. 3. Website displays confirmed categories such as Body Parts, Lighting, Engines, Differential, Electrical, and Gearbox. 4. Customer selects or notes relevant category. 5. Customer proceeds to Request a Quote if needed.
Alternate Flow	If category is unclear, customer can use Contact Us form or message field in Request a Quote form.
Post-condition	Customer has viewed categories and may continue to enquiry submission.
Business Rules	Category names, descriptions, and images must be confirmed by Business Owner / Product Owner before publishing. No live stock or price should be displayed in Phase 1.

UC-02: Submit Request a Quote Form

Item	Description
Primary Actor	Customer / Website Visitor
Trigger	Customer wants price, availability, or follow-up for an auto part.
Pre-condition	Request a Quote form is available and privacy information is accessible near the form.
Main Flow	1. Customer opens Request a Quote form. 2. Customer enters name, email, phone, product category, vehicle details, and enquiry message. 3. Website validates required fields and format. 4. Customer submits the form. 5. Website shows confirmation message. 6. Business receives email notification.
Alternate Flow	If required fields are missing or format is invalid, website shows clear error message and asks customer to correct details.
Post-condition	Quote request is sent to business email inbox for manual review and follow-up.
Business Rules	Required fields must be completed before submission. Newsletter consent must not be pre-selected. Online payment, checkout, login, and live inventory are out of scope.

UC-03: Submit Contact Us Form

Item	Description
Primary Actor	Customer / Website Visitor
Trigger	Customer wants to contact the business for a general question or support request.
Pre-condition	Contact Us page/form is available.
Main Flow	1. Customer opens Contact Us page. 2. Customer enters name, email or phone, subject, and message. 3. Website validates required fields. 4. Customer submits form. 5. Website displays confirmation message. 6. Business receives email notification.
Alternate Flow	If required details are missing, website displays error message and keeps entered data where technically possible.
Post-condition	Contact enquiry is sent to business for manual response.
Business Rules	Contact form should not request unnecessary personal data. Privacy information must be available.

UC-04: Submit Feedback Form

Item	Description
Primary Actor	Customer / Website Visitor
Trigger	Customer wants to share service, website, or enquiry feedback.
Pre-condition	Feedback form is available from navigation or footer.
Main Flow	1. Customer opens Feedback form. 2. Customer enters name or optional contact detail, feedback type, rating if agreed, and feedback message. 3. Website validates required fields. 4. Customer submits feedback. 5. Website displays confirmation message. 6. Business receives email notification.
Alternate Flow	If rating is not agreed by business, feedback form can collect message only.
Post-condition	Feedback is sent to business for review.
Business Rules	Feedback wording and any rating feature must be approved by Business Owner / Product Owner.

UC-05: Subscribe to Newsletter

Item	Description
Primary Actor	Customer / Website Visitor
Trigger	Customer wants to receive business updates or future offers.
Pre-condition	Newsletter subscription area is available and consent wording is shown.
Main Flow	1. Customer enters email address. 2. Customer confirms newsletter consent if required. 3. Website validates email format. 4. Customer submits subscription. 5. Website displays confirmation message.
Alternate Flow	If email format is invalid or consent is not provided where required, website displays clear error message.
Post-condition	Subscription request is captured or sent to business through agreed Phase 1 mechanism.
Business Rules	Newsletter consent must be clear and not pre-selected. Unsubscribe option must be available in future marketing emails.

UC-06: Receive and Review Enquiry Notification

Item	Description
Primary Actor	Business Team
Trigger	Customer submits Request a Quote, Contact Us, or Feedback form.
Pre-condition	Email notification configuration is active and business inbox is confirmed.
Main Flow	1. Website sends email notification to business inbox. 2. Business Team reviews submitted details. 3. Business checks product, vehicle, availability, and price where applicable. 4. Business responds to customer manually.
Alternate Flow	If details are insufficient, Business Team contacts customer for missing information.
Post-condition	Customer receives quote, availability update, or request for more details.
Business Rules	Follow-up remains manual in Phase 1. No automated lead tracking, SQL dashboard, Power BI dashboard, or complex admin portal is included in Phase 1.

6. Requirement Traceability

Use Case ID	Linked Artefacts
UC-01	Product Category Requirements, FRD, Sitemap, Sprint 2 backlog
UC-02	Request a Quote Form Requirements, Data Field List, FRD, NFR, Business Rules
UC-03	Contact Us Requirements, Data Field List, FRD, NFR
UC-04	Feedback Requirements, Data Field List, FRD, Business Rules
UC-05	Newsletter Requirements, Consent Rule, Privacy/Marketing Compliance Check
UC-06	To-Be Process Flow, Email Notification Requirement, Business Follow-up Process

7. Compliance Notes

These use cases include personal data collection through website forms. The Business Analyst documents privacy, consent, cookie, newsletter, accessibility, and claim validation requirements. Final wording must be confirmed by the Business Owner or relevant advisor. This document is not legal advice.

8. Phase 2 Note

The form and enquiry fields may support future Phase 2 reporting for Customer Enquiry and Sales Lead Tracking Dashboard using SQL and Power BI. No SQL or Power BI delivery is included in Phase 1.

9. Portfolio Evidence Note

This document can be saved as anonymised BA portfolio evidence. All identifiable client details must be removed or replaced with Auto Parts SME before sharing on a portfolio website.
