

User Stories Document

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Client Name	Auto Parts SME
Prepared By	Business Analyst
Working Date	25 May 20xx
Sprint	Sprint 2 - Product Categories and Enquiry Forms
Version	v1.0
Status	Draft for Product Owner and Business Owner review

1. Purpose

This document captures the initial user stories for Phase 1 website delivery. The stories are based on the Business Requirements Document, Functional Requirements Document, Non-Functional Requirement document, business rules, sitemap, product category requirements, form requirements, data field list, and use cases.

The user stories will help the Product Owner, Business Analyst, UI/UX Designer, Developer, and QA Tester understand what needs to be delivered and tested in Sprint 1, Sprint 2, and Sprint 3.

2. User Story Format

User stories are written in this format:

As a [user role], I want [goal], so that [business value].

Detailed acceptance criteria will be prepared separately in Stage 31. This document focuses on the user story statements, priority, sprint target, and requirement notes.

3. User Roles

Role	Description	Project relevance
Website Visitor / Customer	Person visiting the website to understand the business, browse categories, or send an enquiry.	Main external user for Phase 1.
Potential Buyer	Customer who wants a quote for an auto part.	Primary user for Request a Quote journey.
Business Team	Internal team that receives website enquiries and follows up manually.	Receives email notifications and responds to customers.

Role	Description	Project relevance
Content Owner	Person responsible for confirming website content and product category wording.	Supports content accuracy and claim validation.
Business Owner / Product Owner	Decision owner for scope, priority, content approval, and release readiness.	Confirms MVP scope and approval before go-live.

4. User Stories Summary

US-17	Business Owner	review submitted enquiries in a future lead tracking dashboard	I can track enquiries, follow-ups, and conversion trends	Could	Future Phase 2	Future SQL and Power BI enhancement only

5. Prioritisation Notes

Priority	Meaning in this project
Must	Required for Phase 1 MVP or release readiness.
Should	Important but may be adjusted if delivery time is limited.
Could	Useful future enhancement, not required for Phase 1 go-live.

6. Out of Scope Reminder

- Customer login is not part of Phase 1.
- Online payment and full checkout are not part of Phase 1.
- Live inventory and product pricing are not part of Phase 1.
- Complex admin portal is not part of Phase 1.
- SQL and Power BI dashboard delivery is not part of Phase 1 and remains Future Phase 2 scope.

7. Compliance and Approval Notes

The user stories include website areas that collect customer data and display customer-facing information. Privacy notice, cookie notice, newsletter consent, unsubscribe wording, company information, legal page wording, and customer-facing claims should be confirmed by the Business Owner or relevant advisor before go-live. This document records BA requirements and does not provide legal advice.

8. Traceability Notes

Source document	How it supports user stories
BRD	Provides business objectives, scope, exclusions, and success criteria.
FRD	Provides website functional behaviour for pages, forms, notifications, and links.
NFR Document	Provides quality criteria such as responsiveness, accessibility, performance, and validation behaviour.
Business Rules Document	Provides scope boundaries, content approval rules, and UAT sign-off rules.
Use Case Document	Provides main and alternate flows that support user story drafting.
Data Field List	Supports quote, contact, feedback, newsletter, validation, and future reporting fields.

9. Next Step

Prepare detailed Acceptance Criteria for the user stories. Acceptance Criteria will define clear testable conditions using simple Given / When / Then style where useful.
