

Current Customer Enquiry Process Note

Field	Value
Project Name	Official Website and Customer Enquiry Management System for a UK Auto Parts SME
Client Name	Auto Parts SME
Document Type	Current Customer Enquiry Process Note
Prepared By	Business Analyst
Sprint	Sprint 0 Discovery Initiation
Linked Jira Task	Document current customer enquiry process
Date	13 May 20XX
Version	1.0

1. Purpose

The purpose of this document is to capture how Auto Parts SME currently receives and manages customer enquiries before the new official website is introduced. This note will support the As-Is Process Flow and future To-Be Process Flow.

2. Current Process Summary

Auto Parts SME currently receives customer enquiries through manual and informal channels. Customers contact the business through phone calls, WhatsApp messages, email enquiries, or direct informal product questions. The business team reviews the request manually and responds based on available product information, pricing, and follow-up discussion.

As-Is Business Flow

3. Current Enquiry Channels

Channel	Current use	Expected frequency
Phone call	Customer calls the business to ask about parts, price, availability, or delivery options.	High
WhatsApp message	Customer sends product enquiry, vehicle details, images, or follow-up messages.	High
Email enquiry	Customer sends product or quote enquiry through email.	Medium
Informal/direct enquiry	Customer asks through personal contact, repeat business, or informal referral.	Medium

4. Current Enquiry Handling Steps

1. Customer contacts Auto Parts SME through phone, WhatsApp, email, or informal channel.
2. Business team asks for product requirement, vehicle details, part information, and contact details if needed.
3. Details are captured manually in chat, email, notes, or memory depending on the channel.
4. Business team checks product availability, price, delivery expectation, or next action manually.
5. Business team responds to customer through the same channel or another preferred channel.
6. Follow-up is handled manually based on individual tracking, reminders, or customer response.
7. There is no single structured system to track enquiry source, quote status, follow-up date, or conversion outcome in Phase 1.

5. Roles Involved in Current Process

Role	Current responsibility
Customer	Raises enquiry and provides product or vehicle details.
Business Owner	Confirms business priorities, pricing approach, and customer service expectations.
Sales / Enquiry Handling Team	Receives enquiries, asks follow-up questions, checks details, and responds to customers.
Content Owner	Provides product category wording and company information for website content.
Business Analyst	Documents current process, pain points, and improvement opportunities. Does not own business decisions.

6. Current Pain Points

1. Customer enquiries are spread across different channels, which makes tracking difficult.
2. Customer details may not be captured in a consistent format.
3. Some enquiries may miss key details such as part category, vehicle model, contact number, or preferred contact method.

4. Follow-up depends on manual reminders and individual tracking.
5. There is no single view of total enquiries or quote requests.
6. It is difficult to identify top requested product categories from manual channels.
7. Compliance wording for privacy, cookies, newsletter consent, and claims needs confirmation before go-live.
8. Customer-facing claims such as free shipping, secure payment, money back, discount, or 24/7 support should not be shown unless confirmed by the Business Owner.

7. Improvement Opportunities for Phase 1 Website

Opportunity	Business value
Structured Request a Quote form	Capture key enquiry details consistently.
Product / Featured Categories section	Help customers choose the relevant auto parts category before raising enquiry.
Contact Us form	Provide a clear formal contact route.
Feedback form	Allow customers to share feedback in a structured way.
Newsletter subscription	Capture consent-based subscription request if agreed by stakeholder.
Email notification	Send submitted quote/contact enquiry to the business email for follow-up.
Privacy and cookie information	Tell customers how their data and cookies are handled, subject to business/advisor confirmation.
Future enquiry dashboard	Keep Phase 2 option open for SQL and Power BI enquiry tracking after website go-live.

8. Regulation and Compliance Notes

1. The Business Analyst will identify compliance-related requirements and track confirmation points. The Business Analyst will not provide legal advice or approve legal wording.
2. Privacy notice needs to cover personal data collected through quote, contact, feedback, and newsletter forms.
3. Cookie notice and cookie preferences need confirmation if analytics, advertising, or non-essential cookies are used.
4. Newsletter subscription should include clear consent and unsubscribe handling if email marketing is used.
5. Company information required on the website should be confirmed by the Business Owner or relevant advisor.
6. Delivery / Returns wording is required if online selling is added in future.

7. Claims such as free shipping, secure payment, money-back wording, discount, or support availability must be confirmed before publishing.

9. Assumptions

1. Current enquiry handling is mainly manual and channel-based.
2. Phase 1 will improve enquiry capture but will not include customer login, online payment, live inventory, or full checkout.
3. Email notification will be used in Phase 1 for submitted forms.
4. Structured SQL and Power BI reporting will be considered in Phase 2 only.
5. Business Owner or relevant advisor will confirm legal and compliance wording before release.

10. Risks

Risk	Impact	Mitigation
Incomplete understanding of current process	Medium	Validate process with Business Owner and Sales / Enquiry Handling Team.
Missing form fields	Medium	Confirm required quote form fields before FRD and user stories.
Unconfirmed compliance wording	Medium	Track compliance confirmation before release readiness.
Unverified marketing claims	Medium	Remove or mark claims as pending until Business Owner confirms.
Manual follow-up remains after website launch	Low	Record Phase 2 reporting/dashboard as future enhancement.

11. Open Questions

1. Which customer details are mandatory for a quote request?
2. Which product categories should appear on the website in Phase 1?
3. Who will receive quote request and contact form email notifications?
4. Will basic analytics be used in Phase 1?
5. Who will confirm Privacy Policy, Cookie Policy, Terms and Conditions, and Delivery / Returns content?
6. Which customer-facing claims are approved for website display?
