

Go-Live Notes

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Document field	Details
Client name	Auto Parts SME
Project name	Official Website and Customer Enquiry Management System for a UK Auto Parts SME
Document type	Go-Live Notes
Prepared by	Business Analyst
Sprint	Sprint 3 - Testing, UAT and Release Readiness
Date	28 May 20xx
Version	1.0
Confidentiality note	Anonymised BA portfolio sample. No real client name, website URL, logo, address, phone number, email, or identifiable client information is included.

1. Purpose

This document records the go-live notes for the Phase 1 website MVP. It summarises release context, go-live scope, release activities, communication points, post-go-live checks, open notes, and ownership for follow-up after launch.

2. Go-Live Summary

Area	Summary
Go-live date	28 May 20xx
Release type	Phase 1 website MVP release
Release decision	Approved to proceed after UAT sign-off and release readiness review
Primary business objective	Provide a professional website where customers can view company information, browse product categories, and submit enquiry or quote requests.
Phase 1 boundary	No customer login, no online payment, no checkout, no live inventory, no customer dashboard, and no SQL/Power BI dashboard.
Release owner	Product Owner / Business Owner
BA role	Supported go-live readiness by confirming UAT outcome, release checklist status, open notes, and business-facing release documentation.

3. Go-Live Scope

- Home page, header navigation, About Us, product/category sections, footer links, and legal information pages.
- Request a Quote form, Contact Us form, Feedback form, and Newsletter subscription area.
- Email notification to the business for submitted quote/contact enquiries.
- Mobile responsive layout and basic accessibility checks.
- Basic SEO requirements and page metadata notes, where agreed by the business.
- UAT completed and business acceptance recorded before release readiness check.

4. Go-Live Activities

Activity	Owner	Status	Notes
Confirm UAT sign-off	Business Owner / Product Owner	Completed	UAT outcome accepted with no critical blocker for go-live.
Confirm release readiness checklist	Business Analyst / Scrum Master	Completed	Release readiness checklist reviewed before launch.
Confirm final website content	Business Owner / Content Owner	Completed with notes	Any remaining wording changes to be handled as post-go-live content updates

			if non-critical.
Confirm legal/footer links	Business Owner / Relevant advisor	Completed with notes	Privacy, cookie, terms and delivery/returns links included for business review.
Confirm form submissions	QA Tester / Business Analyst	Completed	Quote, contact, feedback, and newsletter flows checked during testing/UAT.
Confirm email notifications	Developer / QA Tester	Completed	Business email notification behaviour checked for submitted forms.
Confirm post-go-live support window	Scrum Master / Developer	Completed	Initial support window agreed for launch monitoring.

5. Post-Go-Live Checks

Check area	Expected check	Owner	Timing
Homepage and navigation	Homepage loads correctly and navigation links work.	Business Analyst / QA Tester	Go-live day
Request a Quote form	Valid enquiry can be submitted and confirmation message appears.	Business Analyst / QA Tester	Go-live day
Email notification	Business receives enquiry email notification.	Developer / QA Tester	Go-live day
Contact and Feedback forms	Forms submit correctly with validation and confirmation messages.	QA Tester	Go-live day
Newsletter subscription	Consent wording and subscription behaviour are working as agreed.	Business Analyst / QA Tester	Go-live day
Footer/legal links	Privacy, cookie, terms, and delivery/returns pages are accessible.	Business Analyst / Business Owner	Go-live day
Mobile view	Website layout is usable on mobile screen size.	UI/UX Designer / QA Tester	Go-live day
Analytics, if agreed	Basic analytics setup is confirmed only if stakeholder agreed it.	Developer / Product Owner	Post go-live

6. Open Notes and Follow-Up

Item	Follow-up action	Owner	Priority
Customer-facing claims	Any claim such as free shipping, money back, secure payment, discount, or support timing must remain business-approved before publishing.	Business Owner	High
Privacy and cookie wording	Final wording should remain confirmed by Business Owner or relevant advisor.	Business Owner / Relevant advisor	High
Content updates	Non-critical text or image updates can be managed after launch through agreed content update process.	Content Owner	Medium
Future enquiry tracking	Phase 2 SQL and Power BI dashboard can be assessed after Phase 1 usage data and business process are stable.	Business Owner / Product Owner	Medium
Post-go-live observations	Any business observations after launch should be logged and prioritised for future backlog review.	Product Owner / Business Analyst	Medium

7. Compliance Consideration

The BA has tracked compliance-related release points from a requirements and readiness perspective only. This document does not provide legal advice. Final wording and business compliance decisions should be confirmed by the Business Owner or relevant advisor.

- Privacy notice and form data handling information.
- Cookie notice and preference requirement if analytics or non-essential cookies are used.
- Newsletter consent and unsubscribe handling.
- Company information and footer/legal pages.
- Delivery / Returns information where applicable.
- Customer-facing claim validation before publishing.
- Basic accessibility checks such as readable text, labels, error messages, and mobile usability.

8. SQL / Power BI Involvement

No SQL or Power BI delivery is included in Phase 1 go-live. Phase 2 remains a future enhancement for Customer Enquiry and Sales Lead Tracking Dashboard using SQL and Power BI.

9. Go-Live Decision Summary

Decision point	Status	Notes
UAT completed	Accepted	Business validation completed for Phase 1 MVP scope.
Release readiness completed	Accepted	Checklist reviewed and no critical blocker recorded.
Phase 1 MVP go-live	Approved	Website can move into go-live with agreed post-launch support and follow-up notes.
Phase 2 reporting	Future scope	SQL and Power BI enhancement to be considered after Phase 1 launch.

10. Portfolio Evidence Note

This document can be used as anonymised BA portfolio evidence. Remove or replace any real client name, website URL, logo, address, phone number, email, staff names, or identifiable internal information before publishing.
