

Test Scenario Review

Official Website and Customer Enquiry Management System for a UK Auto Parts SME

Field	Value
Client Name	Auto Parts SME
Prepared By	Business Analyst
Working Date	26 May 20xx
Sprint	Sprint 3 Testing, UAT and Release Readiness
Document Version	v1.0
Confidentiality Note	Anonymised BA portfolio sample. All identifiable client details have been removed or replaced.

1. Purpose

The purpose of this document is to review the test scenarios required for Phase 1 of the website project before User Acceptance Testing (UAT). It helps confirm that the planned tests cover the business requirements, functional requirements, non-functional requirements, business rules, data fields, use cases, user stories, and acceptance criteria.

2. Scope of Test Scenario Review

This review covers Phase 1 website MVP scope only. It focuses on website pages, product categories, enquiry forms, newsletter subscription, email notifications, legal/footer links, mobile responsiveness, accessibility basics, content approval, and release readiness checks.

- Home page, header navigation, About Us, footer and legal links.
- Product category section and category card behaviour.
- Request a Quote, Contact Us, Feedback, and Newsletter forms.
- Form validation, error messages, confirmation messages, and email notification.
- Responsive design, basic accessibility, SEO basics, and content/claim approval.

3. Out of Scope for Phase 1 Testing

- Customer login, customer account dashboard, online payment, checkout, live inventory, mobile app, API integration, SQL database, and Power BI dashboard.
- Advanced product recommendation engine and complex admin portal.

4. Documents Used for Test Scenario Review

Reference Document	Review Use
BRD	Business objectives, scope, exclusions, risks, and success criteria
FRD	Functional behaviour for pages, forms, navigation, footer, and email notification
NFR Document	Responsive design, performance, accessibility, privacy and security basics
Business Rules Document	Form rules, scope boundaries, claim approval, UAT sign-off
Data Field List	Required/optional fields, validation, data type, privacy relevance
Use Case Document	Main flow and alternate flow for customer and business interactions
User Stories and Acceptance Criteria	Testable delivery conditions for each story

5. Test Scenario Review Summary

ID	Area	Test Scenario	Requirement Link	Expected Result	Priority	Type
TS-01	Homepage and navigation	Verify homepage opens and header menu items are visible and clickable.	Homepage, navigation and CTA requirements	Home page displays required sections and menu links route correctly.	High	UI/Functional
TS-02	About Us page	Verify About Us page displays approved company introduction and no identifiable real client detail in portfolio evidence.	About Us requirement	About Us page opens from navigation and displays approved anonymised/business-owned content.	Medium	Content
TS-03	Product categories	Verify product category cards are visible for Body Parts, Lighting, Engines, Differential, Electrical, and Gearbox.	Product Category Requirements	Categories are displayed correctly and do not show price, checkout, or live stock.	High	Functional
TS-04	Request a Quote - valid submission	Submit quote form with all mandatory fields and valid data.	Request a Quote Requirements, Data Field List	Form submits successfully, confirmation message appears, and email notification is sent to business inbox.	High	Functional
TS-05	Request a Quote - validation	Submit quote form with missing mandatory fields or invalid email/phone format.	Business Rules, Acceptance Criteria	Clear error messages are shown and enquiry is not submitted until required details are corrected.	High	Negative
TS-06	Contact Us form	Submit Contact Us form with valid customer details and message.	Contact Requirements	Contact request submits successfully, confirmation message appears, and email notification is sent.	High	Functional
TS-07	Feedback form	Submit feedback form with valid name, email and feedback message.	Feedback Requirements	Feedback submits successfully and confirmation message is displayed.	Medium	Functional

5. Test Scenario Review Summary (continued)

ID	Area	Test Scenario	Requirement Link	Expected Result	Priority	Type
TS-08	Newsletter subscription	Subscribe using a valid email and explicit consent where required.	Newsletter Requirements	Subscription is accepted only when consent requirements are met, and unsubscribe requirement is tracked.	High	Compliance
TS-09	Footer and legal links	Verify Privacy Policy, Cookie Policy, Terms and Conditions, and Delivery / Returns links are visible and open correctly.	Homepage/Footer/Legal Requirements	Footer legal links open correct pages or placeholder pages approved for Phase 1 review.	High	Compliance
TS-10	Customer-facing claims	Review website wording such as free shipping, secure payment, money back, discount, or support availability.	Business Rules, Content Checklist	Unapproved claims are removed or marked for business confirmation before go-live.	High	Content/Compliance
TS-11	Mobile responsive layout	Review key pages and forms on mobile/tablet screen size.	NFR, Wireframe Review Notes	Content, buttons, forms, and footer links remain usable on mobile and tablet.	High	NFR
TS-12	Accessibility basics	Check form labels, readable contrast, keyboard navigation, alt text, and clear error messages.	NFR, Content Checklist	Basic accessibility requirements are met or tracked as action items before release.	High	NFR
TS-13	Email notification content	Verify business email notification includes required submitted details without unnecessary data.	FRD, Data Field List	Email notification contains form type, customer contact details, enquiry details, and timestamp if available.	High	Functional
TS-14	SEO basics	Verify page titles, headings, category wording, alt text, and readable URLs are available where agreed.	SEO Requirement Notes	Basic SEO requirements are implemented or tracked for content owner confirmation.	Medium	SEO/Content

6. BA Review Checklist

Review Area	BA Check	Status
Requirement coverage	Each major BRD/FRD/NFR area has at least one test scenario.	Covered
Form validation	Required, optional, invalid and missing field scenarios are covered.	Covered
Compliance review	Privacy, cookie, newsletter consent, unsubscribe, legal links and claim approval checks are included.	Covered
Accessibility basics	Labels, error messages, readable text, keyboard navigation and alt text checks are included.	Covered
Phase 1 boundary	Out-of-scope items such as payment, login, checkout, live inventory, SQL and Power BI are not included in Phase 1 testing.	Covered
UAT readiness	Scenarios can be converted into UAT test cases and evidence log entries.	Ready

7. Assumptions

- Final website content and legal wording will be confirmed by the Business Owner or relevant advisor before go-live.
- Email notification will be used in Phase 1 instead of a database or admin dashboard.
- Testing will be performed on common desktop and mobile browsers agreed by the team.
- Any analytics/cookie implementation will be reviewed against cookie notice and consent requirements where applicable.

8. Risks and Follow-up Actions

ID	Risk / Follow-up	Action
R-01	Unconfirmed legal or privacy wording may delay UAT sign-off.	Business Owner to confirm wording before UAT starts.
R-02	Unapproved marketing claims may create customer trust risk.	BA to track claim approval with Business Owner.
R-03	Incomplete form validation may affect enquiry quality.	QA to test required fields, invalid data and confirmation messages.
R-04	Email notification failure may cause missed enquiries.	Developer/QA to confirm email delivery and content.

9. Regulation / Compliance Note

The test scenario review includes compliance-related checks from a Business Analyst perspective only. The BA tracks privacy notice, cookie notice, newsletter consent, unsubscribe option, company/legal page information, claim validation, and accessibility basics. Final legal/compliance wording must be confirmed by the Business Owner or relevant advisor.

10. SQL / Power BI Note

SQL and Power BI are not part of Phase 1 testing. Test scenarios for SQL data validation and Power BI dashboard numbers will be prepared separately in Sprint 4 Future Enhancement if the reporting dashboard is approved.

11. Next Step

The next stage is to prepare the User Acceptance Testing (UAT) Plan. The UAT Plan will select business-facing scenarios from this review and define how the Business Owner or Product Owner will validate the website before go-live.

12. Portfolio Evidence Note

This document can be saved as anonymised BA portfolio evidence. Screenshots or final website previews can be added separately if required. All identifiable client details must be removed or replaced with Auto Parts SME.
