

Discovery Meeting Notes

Project Name

ABC School Teacher Led STEM and Coding Learning Platform

Meeting Name

Initial Discovery Meeting

Meeting Date

28 June 20XX

Meeting Time

9:45 AM to 10:05 AM

Document Prepared By

Business Analyst

Meeting Attendees

Name / Role	Responsibility in Meeting
Principal / Product Owner	Confirm business need, scope and priority
Physics Teacher	Share Physics content requirements
Chemistry Teacher	Share Chemistry content requirements
Mathematics Teacher	Share Mathematics content requirements
Computer Science Teacher	Share Coding content requirements
Admin Staff	Explain content management needs
3D / Content Team	Explain content creation input needs
UI/UX Designer	Understand screen layout expectations
Developer Team Representative	Understand system behaviour and technical needs
QA Tester	Understand testing expectations
Business Analyst	Capture requirements and meeting notes
Scrum Master	Facilitate Agile delivery discussion

Meeting Objective

To understand the business need, teacher usage process, STEM and Coding content requirements, admin content management process, approval workflow and classroom display expectations for the ABC School STEM Platform.

Business Requirement Discussion

ABC School wants a teacher led web platform to support classroom teaching using visual and interactive STEM and Coding content. The platform should help teachers explain difficult concepts using 3D videos, animated videos, coding simulations, visual explanations and interactive web content.

The Principal confirmed that the platform will be used only by teachers, admin staff and approval users. Students will not log in and will not use separate devices.

Confirmed Scope

Area	Confirmed Requirement
Teacher Access	Teachers must log in to the web portal
Content Library	Teachers must view STEM and Coding content library
Filter	Teachers must filter content by class, subject and topic
Content Opening	Teachers must open selected approved content
Classroom Display	Teachers must launch content in classroom display mode
Admin Access	Admin must add and manage content details
Content Status	Content should support Draft, Under Review, Approved and Inactive status
Approval	Subject Teacher or Principal should approve content
Role Access	Admin, Teacher and Principal should have different permissions

Confirmed Out of Scope

1. Student portal
2. Student login
3. Student progress tracking
4. Student mobile, tablet or laptop access
5. AR based learning

6. VR headset based learning
7. Payment gateway
8. Parent login
9. Attendance features
10. Live online classes
11. Complex AI recommendation engine
12. Third party paid content marketplace

Teacher Requirement Notes

Subject Teachers confirmed that the first release should focus on difficult topics that are easier to explain visually.

Subject	Sample Topics
Physics	Electric circuit, force and motion, reflection and refraction
Chemistry	H ₂ O molecule, atomic structure, chemical bonding
Mathematics	3D geometry, coordinate geometry, graphs
Computer Science	Flowcharts, if else logic, loops, Python basics, HTML/CSS, SQL basics

Content Requirement Notes

Field	Requirement
Class Level	Required
Subject	Required
Topic	Required
Learning Objective	Required
Content Type	Required
Key Visual Elements	Required
Labels Required	Required where applicable
Duration	Required for videos and animations
Output Format	Required

Approval Owner	Required
----------------	----------

Admin Requirement Notes

Admin Staff confirmed that Admin should be able to:

1. Add new content details
2. Edit content details
3. Assign content to class, subject and topic
4. Set content type
5. Change content status
6. Mark content as Inactive when it should not be visible to teachers

Approval Workflow Discussion

The following workflow was discussed:

1. Admin creates content record in Draft status
2. Admin moves content to Under Review
3. Subject Teacher or Subject Matter Expert reviews academic accuracy
4. Principal or authorised Subject Teacher approves the content
5. Approved content becomes visible to Teachers
6. Inactive content is hidden from Teachers

Classroom Display Mode Discussion

Teachers need a clean classroom display mode because content will be shown on projector or smart board. The display mode should hide unnecessary buttons and show the learning content clearly.

Expected display mode behaviour:

1. Open content in large view
2. Hide admin controls
3. Show only teacher friendly controls
4. Support classroom screen, projector and smart board
5. Show clear loading message if content takes time to open

Initial Non-Functional Requirement Notes

Area	Initial Requirement
Browser Support	Chrome and Edge should be supported
Performance	Content library should load within acceptable time
Usability	Teacher should find content with minimum steps
Security	Users should only access allowed screens based on role
Availability	Platform should be available during school teaching hours
Compatibility	Content should work on classroom screen and smart board

Key Decisions

Decision ID	Decision
D01	First release will not include student login or student portal
D02	Teacher web portal is the main user access for classroom teaching
D03	Only approved content should be visible to Teachers
D04	Content statuses will be Draft, Under Review, Approved and Inactive
D05	Classroom display mode is required for projector and smart board usage
D06	Principal will act as Product Owner for scope and priority decisions

Assumptions

1. Teachers will use school provided classroom screen, projector or smart board.
2. Internet connection will be available in classrooms.
3. Content files or links will be provided by the 3D / Content Team.
4. Admin Staff will maintain content records.
5. Subject Teachers will support content validation.

Open Questions

Question	Owner	Target Closure
Which exact classes are included in Release 1?	Principal / Product Owner	Sprint 0
How many content items are required for MVP?	Principal / Product Owner	Sprint 0
Who has final approval authority for each subject?	Principal / Product Owner	Sprint 0
What is the maximum allowed video or simulation file size?	Developer Team / Content Team	Sprint 0
Should keyword search be included in Sprint 1?	Product Owner	Sprint 0

Action Items

Action Item	Owner	Due Date
Confirm first release classes and subjects	Principal / Product Owner	28 June 2026
Prepare As-Is Process Flow	Business Analyst	28 June 2026
Prepare To-Be Process Flow	Business Analyst	28 June 2026
Prepare Content Requirement Brief format	Business Analyst	28 June 2026
Confirm content file format expectations	Content Team / Developer Team	28 June 2026

Next Step

Prepare As-Is Process Flow and To-Be Process Flow for current teacher content access and future teacher led STEM web platform flow.
