

Project Intake Note

Project Name

Digital STEM Content Delivery Platform

Enquiry Received From

ABC School Owner and Principal

Enquiry Date

28 June 20xx

Business Problem

ABC School wants to improve classroom teaching for STEM and Coding subjects. Teachers currently need better access to visual and interactive learning content that can be shown on a classroom screen, projector or smart board.

Proposed Solution

Create a teacher led web platform where teachers can log in, view STEM and Coding learning content, filter content by class, subject and topic, open selected content and display it in classroom mode.

Current Situation

Teachers have initial mobile based access. ABC School now wants upgraded web access with a structured STEM and Coding content library.

In Scope

1. Teacher login to web portal
2. STEM and Coding learning library
3. Filter content by class, subject and topic
4. Open selected learning content
5. Classroom display mode
6. Admin content management
7. Content status workflow

8. Subject Teacher or Principal approval
9. Role based access for Admin, Teacher and Principal
10. Content types such as 3D video, animated video, coding simulation, visual explanation and interactive web content

Out of Scope

1. Student portal
2. Student login
3. Student progress tracking
4. Student mobile, tablet or laptop access
5. AR based learning
6. VR headset based learning
7. Payment gateway
8. Parent login
9. Attendance features
10. Live online classes
11. Complex AI recommendation engine
12. Third party paid content marketplace

Main Stakeholders

1. School Owner
2. Principal
3. Subject Teachers
4. Admin Staff
5. Scrum Master
6. Trainee Business Analyst
7. Developer Team
8. UI/UX Designer

9. 3D Animation and Content Team
10. Quality Assurance Tester
11. Subject Matter Expert

Initial Business Goals

1. Help teachers explain difficult STEM and Coding topics visually
2. Make approved learning content easy to find
3. Reduce teacher preparation effort
4. Improve classroom explanation using visual and interactive content
5. Maintain content quality through approval workflow

Initial Risks or Points to Clarify

1. Which classes should be included in the first release?
2. Which subjects should be included first?
3. Who will approve content before it is visible to teachers?
4. What content format is expected for videos and simulations?
5. Should classroom display mode work on projector and smart board screens?
6. Should teachers be able to search content by keyword?

Initial Assumption

The first release will focus only on teacher led classroom usage. Students will not log in or use separate devices.

Business Analyst

Next Step

Prepare stakeholder register and discovery questions for Principal, Subject Teachers and Admin Staff.
