

Stakeholder Register

Project Name

Digital STEM Content Delivery Platform

Document Purpose

This document identifies the key stakeholders involved in the project, their roles, responsibilities, level of influence, level of interest and communication needs.

Stakeholder Register

Stakeholder	Role in Project	Main Responsibility	Influence	Interest	Communication Need
School Owner	Business Sponsor	Provides business direction, budget approval and final business support	High	High	Key decisions and project progress
Principal	Product Owner	Confirms scope, priorities, approval workflow and release expectations	High	High	Requirement approval, backlog priority and UAT sign off
Physics Teacher	Subject Teacher	Provides Physics content needs such as electric circuit, force and motion, reflection and refraction	Medium	High	Discovery discussion and content validation
Chemistry Teacher	Subject Teacher	Provides Chemistry content needs such as H2O molecule, atomic structure and chemical bonding	Medium	High	Discovery discussion and content validation
Mathematics Teacher	Subject Teacher	Provides Mathematics content needs such as 3D geometry, coordinate geometry and graphs	Medium	High	Discovery discussion and content validation
Computer Science Teacher	Subject Teacher	Provides Coding content needs such as flowcharts, if else logic, loops, Python basics, HTML, CSS and SQL basics	Medium	High	Discovery discussion and content validation
Admin Staff	Content Admin User	Adds, edits and manages content details and content status	Medium	High	Process clarification and UAT support

Subject Matter Expert	Academic Validator	Checks academic accuracy of learning content before approval	High	Medium	Content review and validation feedback
Business Analyst	BA Support	Captures requirements, prepares BA documents, user stories, acceptance criteria and supports UAT	Medium	High	Daily project coordination and documentation updates
Scrum Master	Delivery Facilitator	Supports sprint planning, ceremonies, impediment tracking and Agile flow	Medium	High	Sprint progress and team coordination
UI/UX Designer	Design Support	Designs teacher portal screens, content library layout and classroom display mode	Medium	Medium	Wireframe review and requirement clarification
Developer Team	Technical Delivery Team	Builds teacher login, library view, filtering, admin content management and approval workflow	Medium	High	User stories, acceptance criteria and technical clarification
3D Animation and Content Team	Content Creation Team	Creates STEM videos, animations, coding simulations and visual learning content	Medium	High	Content Requirement Brief and storyboard clarification
QA Tester	Quality Assurance Tester	Tests functional behaviour, content launch, role access and classroom display mode	Medium	High	Test scenarios, acceptance criteria and defect clarification
UAT Users	Final Business Testers	Validate whether the system meets classroom teaching needs	Medium	High	UAT plan, UAT scripts and feedback collection

Key Stakeholder Notes

1. Principal will act as Product Owner for scope and priority decisions.
2. Subject Teachers will provide topic level learning requirements.
3. Subject Matter Expert will validate academic accuracy.
4. Admin Staff will manage content records and content status.
5. Teachers are the main users of the platform.
6. Students are not system users in this project.
