PROFESSIONAL SUMMARY

Business Analyst with 7+ years spanning business analysis, digital delivery and industrial operations across manufacturing, EdTech and digital consultancy. Skilled in requirements elicitation, gap analysis, process mapping, stakeholder management, data analysis and reporting. Turns business needs into user stories, acceptance criteria, SQL data structures, Power BI reports and working prototypes or MVPs. Helps teams identify gaps early, reduce rework and move projects forward faster, backed by practical operational experience of how business processes work in real environments.

KEY SKILLS

BA Methods: Requirements Elicitation, BRD/FRD, User Stories, Acceptance Criteria, Gap Analysis, Requirements Traceability, Process Mapping (As-Is/To-Be), UAT, BPMN, Agile/Scrum, Stakeholder Management, API

Tools: SQL, Power BI, Jira, Confluence, Lucidchart, Excel, Python

AI Tools: Claude AI, ChatGPT (Codex), n8n, Power BI Copilot, Antigravity IDE

PROFESSIONAL EXPERIENCE

Ckay Solution Limited, United Kingdom, Business Analyst May 2026 – Present

- The client's enquiry handling ran on manual steps and inconsistent forms. Defined 8 website journeys and enquiry rules for the AutoInsight MVP and closed requirement gaps before build started. The live site now brings in around 20 enquiries and quote requests a week.
- Stakeholders had no trusted view of enquiry and quotation performance. Set up the SQL data structure and validated every Power BI figure against source queries across 8 KPI measures and 4 visuals, catching and correcting 6 data and calculation mismatches before go-live.
- MarketLens (ongoing): underwriters can't act on a model they can't explain. Running requirements for a machine learning model predicting quotation-to-sale conversion — training data, field mappings, API contracts, and explainability rules so underwriters can justify each scored quote.

Career Break — MBA Studies & Professional Development, London, UK Jan 2025 – Apr 2026

- Completed a general MBA at Middlesex University, London (awarded Feb 2026).
- Continued professional development through Agile, Business Analysis and technology consulting certifications (through Apr 2026).

FeelTech Digiviation Pvt Ltd, Gujarat, India, Business Analyst Dec 2023 – Dec 2024

- Attendance ran on paper, slow to compile, easy to lose. Led the replacement with role-based mobile and web workflows, now live across 6 educational institutions.
- Admin staff spent 4–6 hours a week compiling attendance records by hand. Defined the attendance dashboard, daily and monthly views, absence flagging, role-based access, removing the manual compilation for teachers and admins across those 6 institutions.
- Two platforms and 4 user roles needed release confidence. Wrote 21 UAT scenarios and ran the pre-release testing that caught 7 defects fixed before both platforms went live.

Jindal Stainless Ltd, Odisha, India, Associate Manager Nov 2017 – Nov 2023

- Production ran entirely on manual operation. Ran the requirements and process analysis for the multi-year automation programme — mapped how the plant ran, set out how it needed to run, and handed requirements to the vendors building the system.
- Found one production step kept overrunning because operators were working two controls at once under time pressure. Specified a single combined control with the vendor, worth about £0.57m a year in shop-floor running cost.

- Vendor-built workflows had never been tested against real operating conditions. Wrote the test scenarios, ran validation in simulation before rollout, and logged 15 usability, process and data-tracking defects fixed before live production.
- Built KPI reporting on production performance data and found process changes worth about £1.1m a year in running cost.

Star Award — process optimisation and productivity (2021) · Idea Champ Award — quality improvement

India Steel Works Ltd, Mumbai, India, Executive

Mar 2016 – Nov 2017

- Conducted unit performance analysis and KPI tracking using Excel-based production data to support operational reporting and process review.
- Prepared benchmarking reports comparing actual results against historical data to identify process improvement opportunities.
- Reviewed quality control activities, including OOS/non-conformance review, process variance checks and corrective action tracking.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- PwC US Technology Consulting Job Simulation (Forage): created a discovery workshop guide, business user stories, MVP roadmap and executive summary for an ERP compliance and SOX controls system upgrade.
- Professional Certificate in Agile Project Management — Atlassian
- Business Analysis A to Z Masterclass — Udemy
- Business Analysis for Project Managers — International Institute of Business Analysis

EDUCATION

- Master of Business Administration (MBA) — Middlesex University, London, UK (Completed Feb 2026)
- B.Tech, Metallurgy & Material Engineering — National Institute of Technology, Srinagar, India(Completed in 2015)
