

ABC School Web and Mobile Application

Figma Wireframe Review

Business Analyst portfolio project showing editable wireframes for Teacher mobile workflows, Admin web workflows and cybersecurity enhancement screens.

Project Summary

Tool: Figma

Total screens: 14 screens: 10 core product screens and 4 cybersecurity enhancement screens

Platforms: Teacher Android mobile app and Admin web application

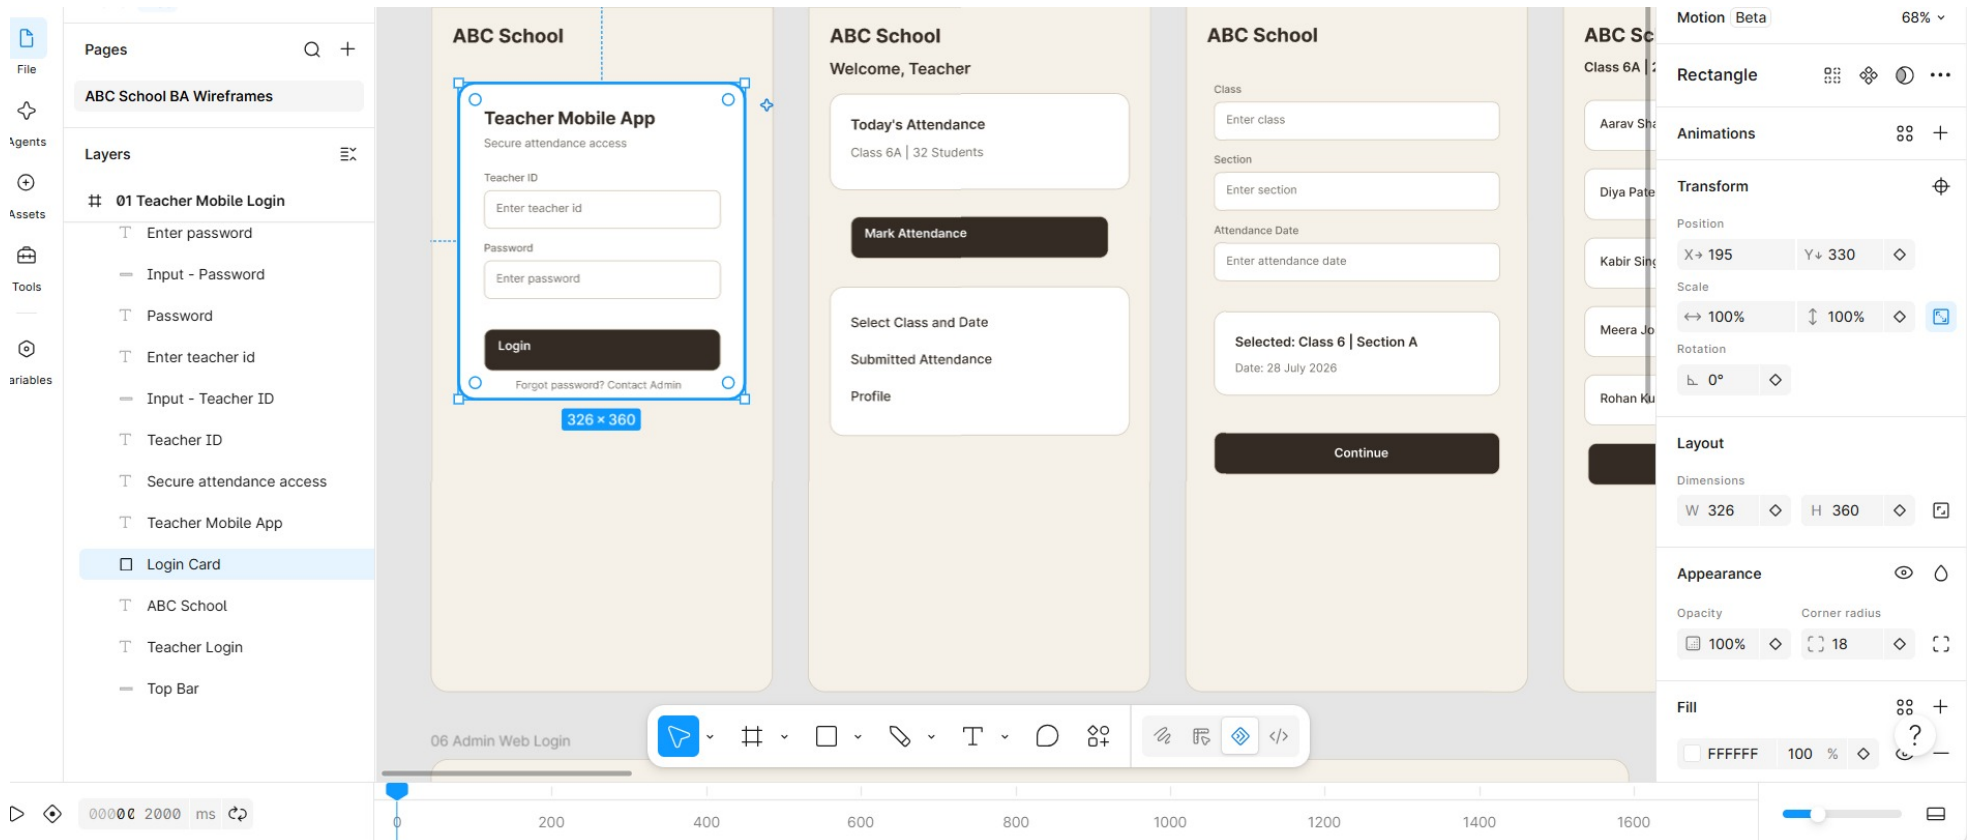

BA purpose: Wireframe review, stakeholder alignment, UI validation and UAT preparation

Scope covered: Login, attendance marking, attendance submission, student management, teacher management, reports and role-based access controls

Project note: This is a simulated Agile Business Analyst portfolio project. No real school, teacher or student data is used.

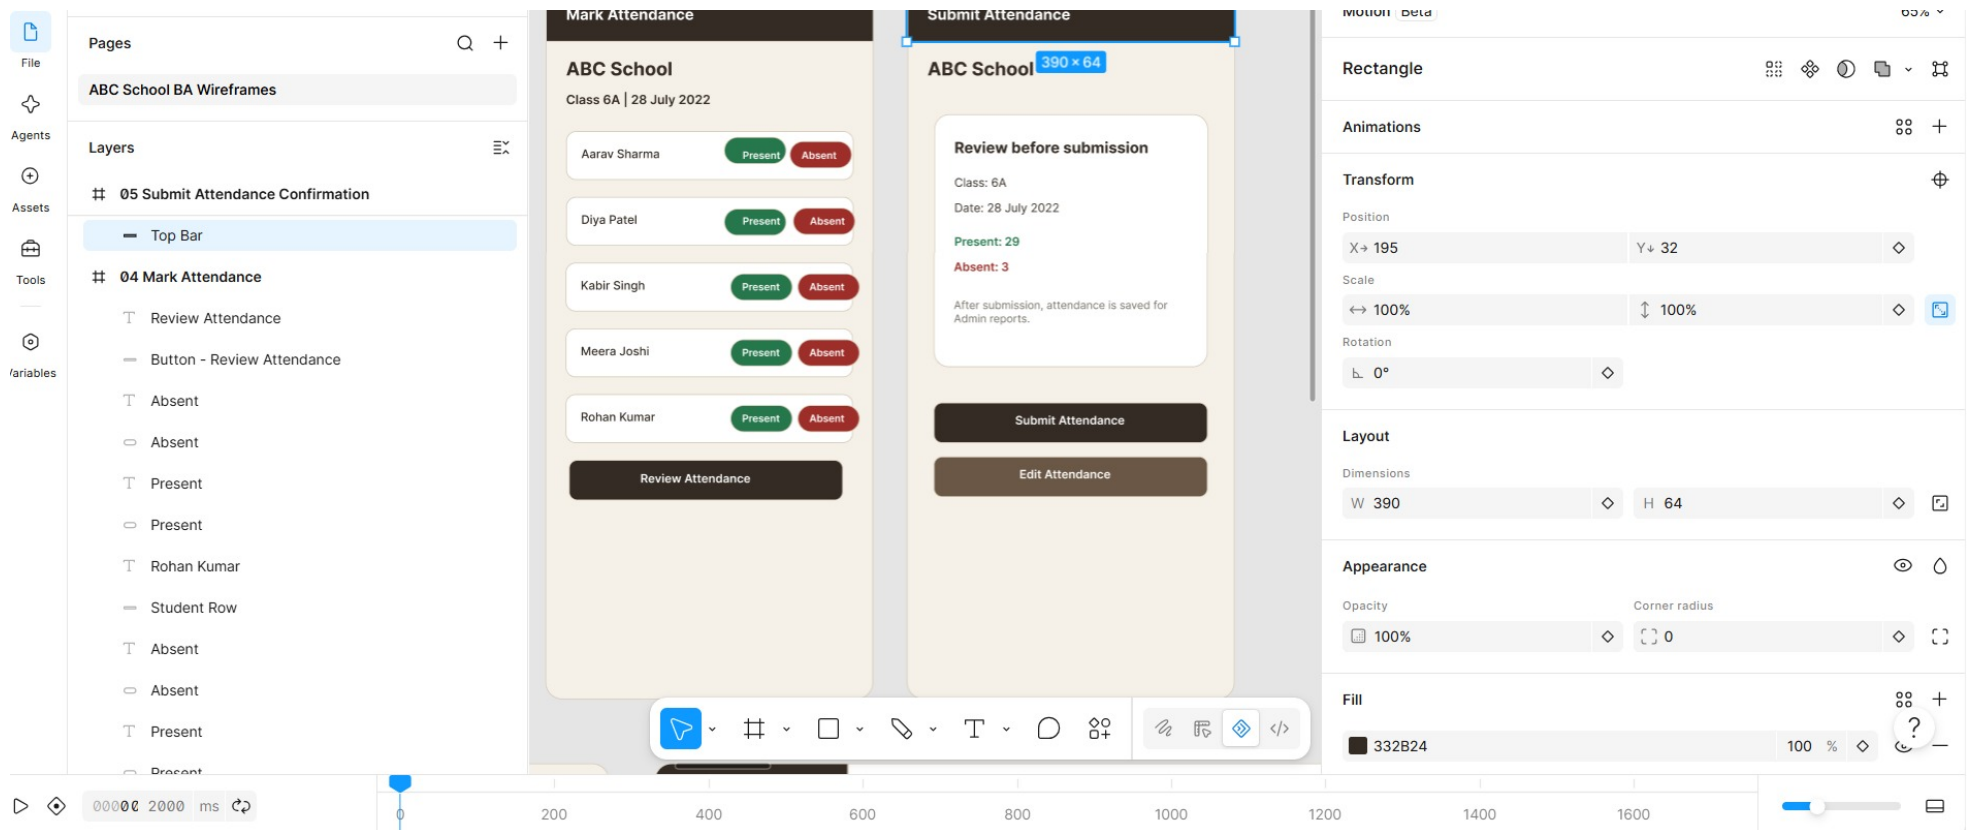

Figma Canvas - Teacher Mobile Workflow

Figma canvas view showing Teacher mobile screens with editable layers and screen structure.

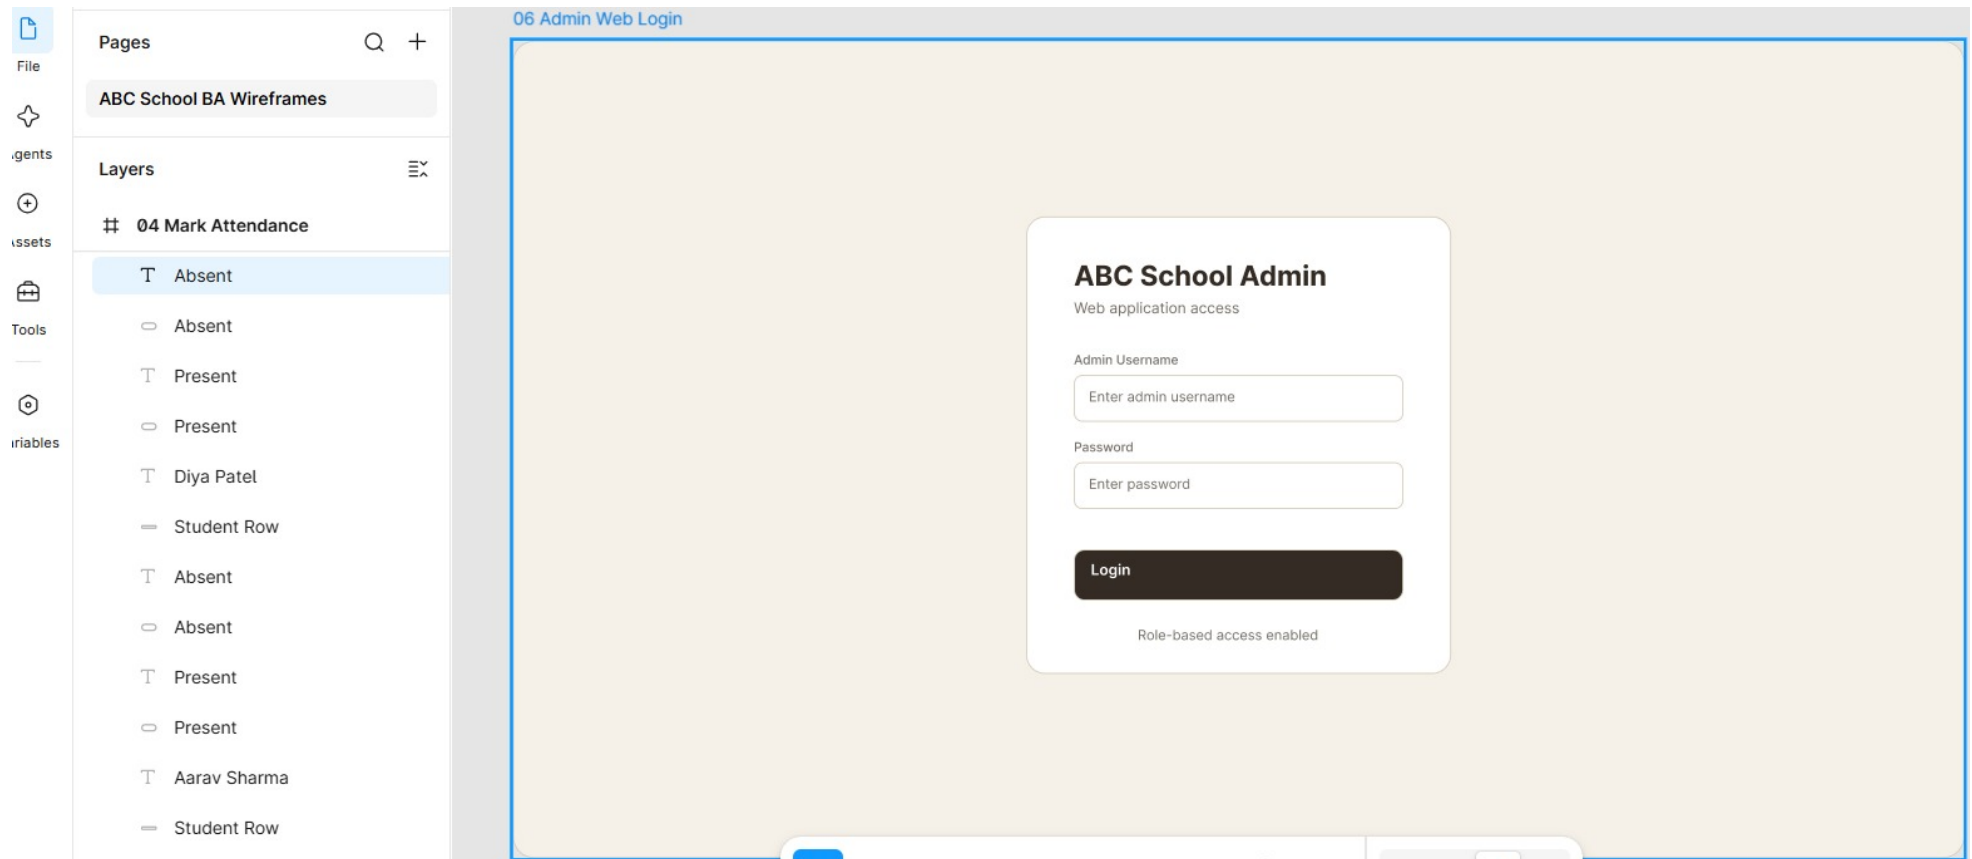

Teacher Mobile Login and Attendance Screens

Teacher flow includes login, dashboard, class/date selection, attendance marking and attendance submission review.

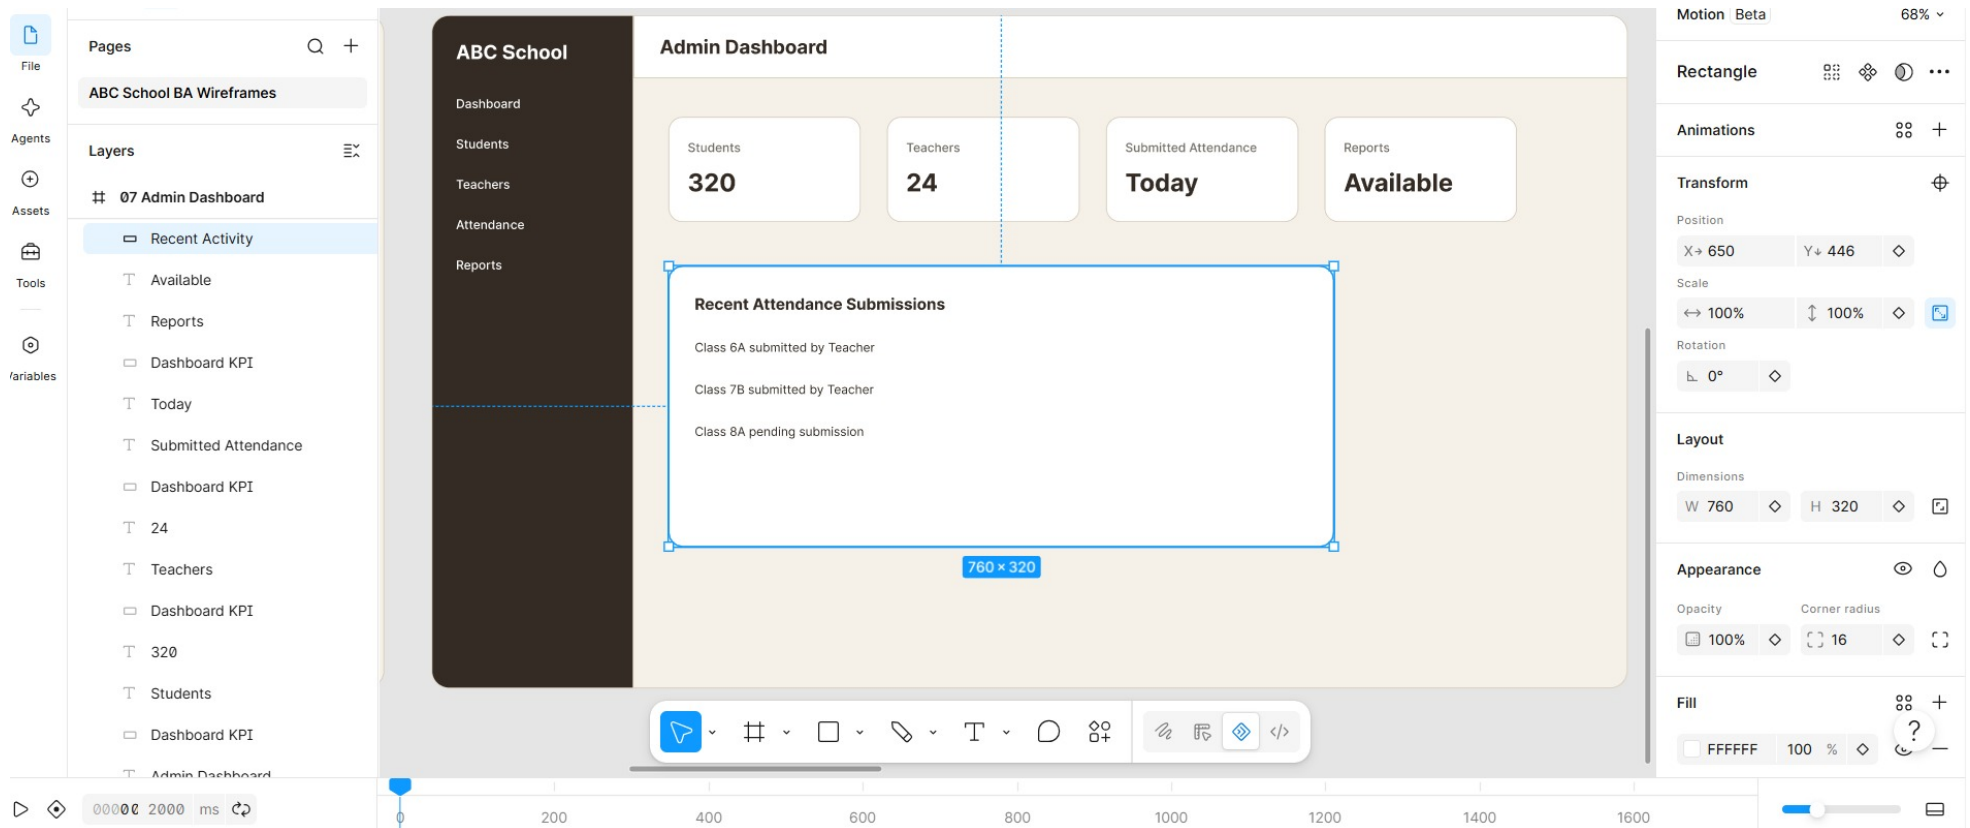

Admin Web Login Screen

Admin web login screen shows role-based access entry point for the Admin web application.

Admin Dashboard Screen

Admin dashboard view shows student, teacher, submitted attendance and report summary areas.

Cybersecurity Enhancement Screens

Security enhancement screens include access denied, session timeout, inactive teacher login blocked and audit trail view.
