

Business Requirements Document

Digital STEM Content Delivery Platform

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	Business Requirements Document
Prepared By	Shiv Satyam Singh
Version	1.0
Date	xx June 20xx
Status	Draft for Product Owner Review

1. Document Purpose

This Business Requirements Document captures the high-level business needs for ABC School's Digital STEM Content Delivery Platform. It converts discovery findings, As-Is Process Flow, and To-Be Process Flow into clear business requirements for approval before functional requirements and user stories are finalised.

2. Project Background

ABC School wants to improve classroom teaching for Science, Technology, Engineering, Mathematics and Coding topics. Teachers currently rely on limited mobile access, shared content sources, and manual coordination to find learning content. The school needs a teacher-led web platform where approved visual and interactive content can be opened and displayed on a classroom screen, projector or smart board.

3. Business Problem

- Teachers do not have a structured web library for STEM and Coding content.
- Content is not consistently organised by class, subject and topic.
- Approval status is unclear because content review is handled manually.
- Teachers may spend extra time finding suitable content for classroom explanation.
- Admin Staff do not have a proper content management workflow.
- There is no clean classroom display mode for projector or smart board usage.

4. Business Objectives

Objective ID	Business Objective
BO-01	Provide Teachers with a browser-based platform to access STEM and Coding content.
BO-02	Organise learning content by class, subject, topic and content type.
BO-03	Allow Teachers to filter and locate approved content quickly.
BO-04	Introduce content status workflow for Draft, Under Review, Approved and Inactive content.
BO-05	Allow authorised reviewers to approve content before classroom use.
BO-06	Provide classroom display mode for projector and smart board usage.
BO-07	Improve content governance by ensuring only approved content is visible to Teachers.

5. Project Scope

5.1 In Scope

- Teacher login to web portal.
- Teacher dashboard and STEM/Coding content library access.
- Filter content by class, subject and topic.
- Open selected approved learning content.
- Launch content in classroom display mode.
- Admin content management for content records and metadata.
- Content status workflow: Draft, Under Review, Approved and Inactive.
- Approval by Principal, authorised Subject Teacher or Subject Matter Expert.
- Role-based access for Admin Staff, Teacher and Principal / Approval Owner.
- Supported content types: 3D video, animated video, coding simulation, visual explanation and interactive web content.

5.2 Out of Scope

- Student portal and student login.
- Student progress tracking.
- Separate student device access.
- Attendance features.
- Parent login.
- Payment gateway.
- Live online classes.

- AR-based learning and VR headset-based learning.
- Complex AI recommendation engine.
- Third-party paid content marketplace.

6. Stakeholders

Stakeholder	Role / Responsibility
School Owner	Business sponsor and final business support.
Principal / Product Owner	Confirms scope, priorities, approval rules and release expectations.
Subject Teachers	Provide topic-level teaching needs and support content validation.
Admin Staff	Manage content records and content status.
Subject Matter Expert	Validates academic accuracy of learning content.
Business Analyst	Documents business requirements, process flows, user stories and acceptance criteria.
Scrum Master	Supports Agile delivery, sprint planning and team coordination.
UI/UX Designer	Designs portal screens and classroom display layout.
Developer Team	Builds web portal, library, filters, approval workflow and display mode.
3D / Content Team	Creates STEM videos, animations, simulations and visual content.
QA Tester	Tests system behaviour against acceptance criteria.

7. High-Level Business Requirements

Req ID	Requirement Area	Business Requirement	Priority
BR-01	Teacher Web Access	Teachers must be able to access the platform through a web browser using valid login credentials.	Must Have
BR-02	Role-Based Access	The platform must provide different access for Admin Staff, Teachers and Principal / Approval Owner.	Must Have
BR-03	Content Library	Teachers must be able to view a STEM and Coding content library containing approved learning content.	Must Have
BR-04	Content Filtering	Teachers must be able to filter content by class, subject and topic.	Must Have
BR-05	Approved Content Visibility	Only content with Approved status must be visible to Teachers.	Must Have

BR-06	Content Details	Each content item must include class, subject, topic, content type, learning objective and status.	Must Have
BR-07	Admin Content Management	Admin Staff must be able to add, edit and manage content records.	Must Have
BR-08	Content Status Workflow	The platform must support Draft, Under Review, Approved and Inactive content statuses.	Must Have
BR-09	Content Approval	Principal, authorised Subject Teacher or Subject Matter Expert must be able to review and approve content.	Must Have
BR-10	Classroom Display Mode	Teachers must be able to launch content in a clean display mode for projector or smart board usage.	Must Have
BR-11	Content Type Support	The platform must support 3D video, animated video, coding simulation, visual explanation and interactive web content.	Should Have
BR-12	Inactive Content Handling	Inactive content must not be visible to Teachers in the classroom content library.	Must Have

8. Business Rules

Rule ID	Business Rule
BRULE-01	Teacher must log in before accessing learning content.
BRULE-02	Teacher can view only Approved content.
BRULE-03	Draft content must not be visible to Teacher.
BRULE-04	Under Review content must not be visible to Teacher.
BRULE-05	Inactive content must not be visible to Teacher.
BRULE-06	Admin Staff can create and update content records.
BRULE-07	Content must have class, subject, topic and content type.
BRULE-08	Principal or authorised Subject Teacher can approve content.
BRULE-09	Classroom display mode must hide unnecessary admin controls.
BRULE-10	Role-based access must control Teacher, Admin and Principal actions.

9. Initial Non-Functional Business Needs

Area	Business Need
Usability	Teachers should be able to find and launch content with minimum steps during classroom teaching.
Performance	Content library and selected content should load within acceptable classroom teaching time.
Compatibility	Platform should support commonly used browsers such as Chrome and Edge.
Security	Users should only access screens and actions allowed for their role.
Availability	Platform should be available during school teaching hours.
Display	Classroom display mode should provide a clean view suitable for projector and smart board usage.

10. Assumptions

- Teachers will use school-supported classroom screen, projector or smart board.
- Internet connectivity will be available in classrooms.
- Admin Staff will maintain content records after release.
- Subject Teachers or Subject Matter Expert will support academic validation.
- The first release will focus only on teacher-led classroom usage.

11. Dependencies

Dependency ID	Dependency	Owner
DEP-01	Confirmation of first release classes and subjects.	Principal / Product Owner
DEP-02	Availability of sample STEM and Coding content files or links.	3D / Content Team
DEP-03	Confirmation of approved content statuses and approval owner.	Principal / Product Owner
DEP-04	Browser and classroom device compatibility expectations.	Developer Team / School IT
DEP-05	Academic validation support from Subject Teachers or Subject Matter Expert.	Subject Teachers / SME

12. Risks and Mitigation

Risk ID	Risk	Impact	Mitigation
R-01	Content approval owner is unclear.	Approved content may be delayed.	Confirm approval owner during backlog refinement.
R-02	Large video or simulation files may load slowly.	Classroom usage may be affected.	Agree file size and format expectations with Developer and Content Team.
R-03	Content metadata is incomplete.	Filters may not work properly.	Make class, subject, topic and content type mandatory fields.
R-04	Teachers may find classroom display mode difficult to use.	Low adoption risk.	Review wireframes with Teachers before development.

13. Success Criteria

- Teacher can log in and access the platform through web browser.
- Teacher can view only approved STEM and Coding content.
- Teacher can filter content by class, subject and topic.
- Teacher can launch selected content in classroom display mode.
- Admin can add and manage content records.
- Content approval workflow supports Draft, Under Review, Approved and Inactive statuses.
- Principal or authorised reviewer can approve content before Teacher visibility.

14. Requirement Traceability Summary

Source	How It Supports BRD
Discovery Meeting Notes	Confirmed scope, out of scope, stakeholders, content needs and approval expectations.
As-Is Process Flow	Identified current manual process, pain points and gaps.
To-Be Process Flow	Defined future content management, approval and teacher access process.
Stakeholder Register	Confirmed stakeholder roles and communication needs.
RACI Matrix	Confirmed ownership for requirements, content approval, development, QA and UAT.

15. Approval and Next Step

This BRD should be reviewed with the Principal / Product Owner. Once approved, the Business Analyst will prepare the Functional Requirements Document, Business Rules Document, Use Case Document and initial user stories with acceptance criteria.

Role	Name	Status	Date
Business Analyst	Business Analyst	Prepared	28 June 2026
Principal / Product Owner	To be confirmed	Pending Review	
Scrum Master	Scrum Master	Reviewed for Sprint 0 readiness	28 June 2026
