

Content Requirement Brief

Digital STEM Content Delivery Platform

Project Details

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	Content Requirement Brief
Prepared By	Business Analyst
Version	1.0
Date	00 0000

1. Document Purpose

This Content Requirement Brief captures the learning content requirements for the Digital STEM Content Delivery Platform. It explains what content is needed, why it is needed, who will review it, and what the 3D / Animation / Content Team should create or prepare for classroom usage.

2. Document Inputs

- Discovery Meeting Notes
- Approved Business Requirements Document
- Functional Requirements Document
- Business Rules Document
- Use Case Document
- Data Field List
- Role and Permission Matrix

3. Content Requirement Summary

ABC School requires teacher-led STEM and Coding content that can be opened by Teachers from the web portal and displayed on a classroom screen, projector or smart board. Content should support visual explanation of difficult concepts and must be reviewed before it becomes visible to Teachers.

4. Content Requirement Fields

Field	Description
Content ID	Unique reference for each requested content item.
Class Level	Class or grade for which the content is required.
Subject	Subject such as Physics, Chemistry, Mathematics or Computer Science.
Topic	Specific learning topic.
Learning Objective	What the Teacher should be able to explain using this content.
Content Type	3D video, animated video, coding simulation, visual explanation or interactive web content.
Key Visual Elements	Main visual components required in the content.
Labels Required	Labels, annotations or callouts required in the content.
Suggested Duration	Expected duration for video or animation content.
Output Format	Expected delivery format such as MP4, HTML5, interactive web link or simulation link.
Approval Owner	Subject Teacher, SME or Principal responsible for academic approval.
Acceptance Criteria	Conditions that must be met before content is approved.

5. Initial Content Requirement List

Content ID	Class	Subject	Topic	Content Type	Priority
CRB-01	Class 6 / 7	Chemistry	H2O Molecule	3D Video / Interactive 3D	High
CRB-02	Class 7 / 8	Physics	Electric Circuit	Animated Video / Interactive Web Content	High
CRB-03	Class 8 / 9	Mathematics	3D Geometry	Visual Explanation / 3D Animation	Medium
CRB-04	Class 7 / 8	Computer Science	If-Else Logic	Coding Simulation	High
CRB-05	Class 8 / 9	Computer Science	Loops in Programming	Coding Simulation	Medium

6. Detailed Content Briefs

6.1 CRB-01: H2O Molecule

Field	Details
Class Level	Class 6 / 7
Subject	Chemistry
Topic	H2O Molecule
Learning Objective	Teacher should be able to explain that a water molecule has two hydrogen atoms and one oxygen atom, and show the basic bond structure visually.
Content Type	3D Video / Interactive 3D
Key Visual Elements	Oxygen atom, two hydrogen atoms, bond angle view, simple molecular structure, rotate view.
Labels Required	Oxygen, Hydrogen, H-O bond, H2O molecule.
Suggested Duration	2 to 3 minutes for video; interactive view should allow simple rotation.
Output Format	MP4 for video or browser-compatible interactive 3D link.
Approval Owner	Chemistry Subject Teacher / Subject Matter Expert.
Acceptance Criteria	Content must show correct atom count, clear labels, classroom-readable visuals and approval status before Teacher visibility.

6.2 CRB-02: Electric Circuit

Field	Details
Class Level	Class 7 / 8
Subject	Physics
Topic	Electric Circuit
Learning Objective	Teacher should be able to explain simple circuit components and the difference between open and closed circuit.
Content Type	Animated Video / Interactive Web Content
Key Visual Elements	Cell, wire, switch, bulb, current direction, open switch, closed switch.
Labels Required	Cell, wire, switch, bulb, current flow, open circuit, closed circuit.
Suggested Duration	3 to 5 minutes.
Output Format	MP4 animation or browser-compatible interactive simulation.
Approval Owner	Physics Subject Teacher / Principal if required.
Acceptance Criteria	Content must clearly show circuit behaviour, correct labels, simple classroom view and approved status before Teacher access.

6.3 CRB-03: 3D Geometry

Field	Details
Class Level	Class 8 / 9
Subject	Mathematics
Topic	3D Geometry
Learning Objective	Teacher should be able to explain basic 3D shapes, faces, edges and vertices using visual content.
Content Type	Visual Explanation / 3D Animation
Key Visual Elements	Cube, cuboid, sphere, cone, cylinder, face-edge-vertex labels.
Labels Required	Face, edge, vertex, cube, cuboid, sphere, cone, cylinder.
Suggested Duration	3 to 4 minutes.
Output Format	MP4 animation or interactive visual web content.
Approval Owner	Mathematics Subject Teacher.
Acceptance Criteria	Content must correctly label shapes and support classroom display mode with readable visuals.

6.4 CRB-04: If-Else Logic

Field	Details
Class Level	Class 7 / 8
Subject	Computer Science
Topic	If-Else Logic
Learning Objective	Teacher should be able to explain decision-making logic using simple conditions and outputs.
Content Type	Coding Simulation
Key Visual Elements	Condition block, true path, false path, simple example such as pass/fail or number comparison.
Labels Required	If condition, true, false, else, output.
Suggested Duration	3 to 5 minutes.
Output Format	Browser-compatible coding simulation or interactive web content.
Approval Owner	Computer Science Subject Teacher / SME.
Acceptance Criteria	Simulation must show clear logic flow, simple examples and readable display on classroom screen.

7. General Content Acceptance Criteria

- Content must match the approved class, subject and topic.
- Learning objective must be clear and classroom relevant.
- Visual labels must be readable on classroom screen, projector or smart board.
- Academic accuracy must be reviewed by Subject Teacher or Subject Matter Expert.
- Content must have Approved status before it is visible to Teachers.
- Content should open properly in classroom display mode.
- Content should not include unnecessary editing or admin controls in display mode.

8. BA Communication Plan for Content Requirements

Stakeholder	Business Analyst Communication
Product Owner / Principal	Confirm priority, approval owner and first release content scope.
Subject Teacher / SME	Confirm learning objective, academic accuracy, labels and suitability.
3D / Animation / Content Team	Share topic brief, key visual elements, duration, labels and output format.
Developer Team	Confirm supported file/link format and how content will open in the web portal.
UI/UX Designer	Confirm content detail page and classroom display mode layout requirements.
QA Tester	Share acceptance criteria for content launch, visibility and approval status testing.

9. Assumptions

- Initial content list is for release planning and can be prioritised by Product Owner.
- Subject Teachers or SMEs will validate academic accuracy before content becomes Approved.
- Content files or links will be provided by the Content Team or agreed content source.
- Release 1 focuses on teacher-led classroom display only.
- Students will not log in or use separate devices in Release 1.

10. Dependencies

Dependency ID	Dependency	Owner
DEP-01	Confirmation of first release classes, subjects and topics.	Principal / Product Owner
DEP-02	Subject Teacher or SME availability for content validation.	Principal / Product Owner
DEP-03	Content creation timeline for 3D, animation and simulation assets.	3D / Animation / Content Team
DEP-04	Final file or link format supported by the web platform.	Developer Team / Content Team
DEP-05	Classroom display mode layout confirmation.	UI/UX Designer / Teacher

11. Next Step

After this Content Requirement Brief is reviewed, the Business Analyst will prepare the Learning Objective Matrix to map each content item to class level, subject, topic, learning objective and validation owner.
