

User Stories and Acceptance Criteria

Digital STEM Content Delivery Platform

Project Details

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	User Stories and Acceptance Criteria
Prepared By	Business Analyst
Version	1.0
Date	00 00000

1. Document Purpose

This document captures initial Agile user stories and acceptance criteria for the Digital STEM Content Delivery Platform. The stories convert approved requirements, business rules, use cases, data fields, role permissions and content requirements into backlog-ready work items for Sprint 1 and Sprint 2 planning.

2. Document Inputs

- Approved Business Requirements Document
- Functional Requirements Document
- Non-Functional Requirements Document
- Business Rules Document
- Use Case Document
- Data Field List
- Role and Permission Matrix
- Content Requirement Brief
- Learning Objective Matrix
- Content Storyboard / Scene Flow

3. User Story Format

The user stories follow the format below:

As a [user role], I want [capability], so that [business value].

Acceptance criteria are written in Given / When / Then format to support development and QA testing.

4. Epic Summary

Epic ID	Epic Name	Description
EPIC-01	User Login and Role-Based Access	Login validation and role-based landing options.
EPIC-02	Teacher Content Library	Teacher views, filters and opens approved STEM and Coding content.
EPIC-03	Classroom Display Mode	Teacher launches selected content in a clean classroom display view.
EPIC-04	Admin Content Management	Admin creates and manages content records and metadata.
EPIC-05	Content Review and Approval	Authorised reviewer approves content before Teacher visibility.
EPIC-06	Content Visibility and Status Control	System controls visibility based on Draft, Under Review, Approved and Inactive statuses.

5. User Story Summary

Story ID	Epic	Story Name	User Story	Priority	Story Points
US-01	EPIC-01	User Login	As a user, I want to log in to the web portal so that I can access platform features based on my role.	Must Have	3
US-02	EPIC-01	Role-Based Dashboard	As a user, I want to see dashboard options based on my role so that I	Must Have	3

			can access only relevant actions.		
US-03	EPIC-02	View Approved Content Library	As a Teacher, I want to view approved STEM and Coding content so that I can use it for classroom explanation.	Must Have	5
US-04	EPIC-02	Filter Content	As a Teacher, I want to filter content by class, subject and topic so that I can quickly find suitable content.	Must Have	5
US-05	EPIC-02	View Content Details	As a Teacher, I want to view content details before launch so that I can confirm it matches my classroom topic.	Must Have	3
US-06	EPIC-03	Launch Classroom Display Mode	As a Teacher, I want to launch selected content in classroom display mode so that students can view it on a projector or smart board.	Must Have	5
US-07	EPIC-04	View Content Management List	As an Admin Staff member, I want to view content records so that I can manage learning content details.	Must Have	3
US-08	EPIC-04	Add Content Record	As an Admin Staff member, I want to add a content record with metadata so that content can be organised properly.	Must Have	5

US-09	EPIC-04	Submit Content for Review	As an Admin Staff member, I want to submit Draft content for review so that it can be approved before Teacher visibility.	Must Have	3
US-10	EPIC-05	Review Content	As an Approval Owner or Subject Teacher, I want to review submitted content so that academic accuracy can be confirmed.	Must Have	5
US-11	EPIC-05	Approve Content	As an Approval Owner, I want to approve suitable content so that it becomes visible to Teachers.	Must Have	3
US-12	EPIC-06	Hide Inactive Content	As an authorised user, I want inactive content hidden from Teachers so that only current approved content is used in class.	Should Have	3

6. Detailed User Stories and Acceptance Criteria

US-01: User Login

Acceptance Criteria:

- Given the user opens the web portal, When the login page loads, Then the system displays fields for username/email and password.
- Given the user enters valid credentials, When the user clicks Login, Then the system validates the credentials and allows access.
- Given the user enters invalid credentials, When the user clicks Login, Then the system shows a clear login error message.
- Given the user account is inactive, When the user attempts login, Then the system blocks access.

US-02: Role-Based Dashboard

Acceptance Criteria:

- Given a Teacher logs in successfully, When the dashboard loads, Then the system shows Teacher content library options only.
- Given Admin Staff logs in successfully, When the dashboard loads, Then the system shows content management options.
- Given Principal / Approval Owner logs in successfully, When the dashboard loads, Then the system shows review and approval options.
- Given any user logs in, When the dashboard loads, Then the system hides actions not allowed for that role.

US-03: View Approved Content Library

Acceptance Criteria:

- Given the Teacher is logged in, When the Teacher opens the content library, Then the system displays Approved content only.
- Given Draft content exists, When Teacher views the library, Then Draft content is not visible.
- Given Under Review content exists, When Teacher views the library, Then Under Review content is not visible.
- Given Inactive content exists, When Teacher views the library, Then Inactive content is not visible.

US-04: Filter Content

Acceptance Criteria:

- Given the Teacher is on the content library, When the Teacher selects class, subject and topic filters, Then the system displays matching Approved content.
- Given no content matches the selected filters, When the Teacher applies filters, Then the system shows a clear no matching content message.
- Given the Teacher changes a filter value, When the filter is applied, Then the result list refreshes based on the new filter.
- Given content is not Approved, When the Teacher applies filters, Then the content remains hidden from results.

US-05: View Content Details

Acceptance Criteria:

- Given the Teacher selects an Approved content item, When the content details page opens, Then the system displays title, class, subject, topic, content type and learning objective.
- Given the selected content has a file or link, When the details page opens, Then the Launch Content option is available.
- Given the selected content is missing a file or link, When the details page opens, Then the Launch Content option is not available or shows a clear message.

US-06: Launch Classroom Display Mode

Acceptance Criteria:

- Given the Teacher is viewing Approved content, When the Teacher clicks Launch Content, Then the system opens classroom display mode.
- Given classroom display mode opens, When content is displayed, Then unnecessary Admin and approval controls are hidden.
- Given content takes time to load, When display mode is opening, Then the system shows a loading indication.
- Given content cannot be opened, When the Teacher launches content, Then the system shows a clear error message.

US-07: View Content Management List

Acceptance Criteria:

- Given Admin Staff is logged in, When Admin opens content management, Then the system displays content records.
- Given content records have statuses, When Admin views the list, Then the system displays Draft, Under Review, Approved or Inactive status.
- Given Teacher is logged in, When Teacher attempts to access content management, Then the system blocks access.

US-08: Add Content Record

Acceptance Criteria:

- Given Admin Staff opens Add Content, When mandatory fields are entered, Then the system allows the content record to be saved.
- Given mandatory fields are missing, When Admin attempts to submit for review, Then the system blocks submission and shows validation messages.
- Given a new content record is saved, When saving completes, Then the system creates a unique Content ID and stores the record in Draft status.

US-09: Submit Content for Review

Acceptance Criteria:

- Given content is in Draft status with mandatory metadata complete, When Admin clicks Submit for Review, Then the system changes status to Under Review.
- Given content is Under Review, When Teacher opens the content library, Then the content is not visible.
- Given mandatory metadata is incomplete, When Admin clicks Submit for Review, Then the system blocks the action.

US-10: Review Content

Acceptance Criteria:

- Given content is Under Review, When the Approval Owner opens the review screen, Then the system displays content details, learning objective and file/link.
- Given the reviewer is authorised, When reviewer adds review comments, Then the system stores the comments.
- Given the reviewer is not authorised, When the user attempts review action, Then the system blocks the action.

US-11: Approve Content

Acceptance Criteria:

- Given the authorised approver reviews suitable content, When approver clicks Approve, Then the system changes status to Approved.
- Given content status becomes Approved, When Teacher opens the library, Then the content becomes visible.
- Given content is not suitable, When reviewer sends it back for correction, Then the system requires review comments.

US-12: Hide Inactive Content

Acceptance Criteria:

- Given authorised user marks content as Inactive, When the status is saved, Then the system hides it from Teacher library.
- Given content is Inactive, When Teacher filters the library, Then the content does not appear.
- Given content needs to be reused, When Admin or Approval Owner reactivates it, Then it must follow the agreed review or approval rule before Teacher visibility.

7. Definition of Ready

- User story has a clear role, capability and business value.
- Acceptance criteria are written in testable Given / When / Then format.
- Dependencies are identified where required.
- Story is linked to the relevant epic and requirement area.
- Product Owner priority is available before sprint planning.

8. Definition of Done

- Functionality is developed and available in the test environment.
- Acceptance criteria are passed by QA testing.
- Role-based access and content visibility rules are validated.
- Business Analyst functional review is completed where required.
- Product Owner accepts the story during Sprint Review or UAT.

9. Assumptions

- Story point estimates are initial BA simulation estimates and may be refined during backlog refinement.
- Release 1 focuses on teacher-led classroom delivery only.
- Student portal, student login and student progress tracking are out of scope.
- Final technical implementation details will be confirmed by the Developer Team.
- Content creation timeline will be confirmed by the 3D / Animation / Content Team.

10. Next Step

After this document is reviewed, the Business Analyst will prepare the Product Backlog and Sprint Backlog for Sprint 1 and Sprint 2 planning.
