

# SHIV SATYAM SINGH

Business Analyst | Requirements, Process and Stakeholder Delivery | Agile and Waterfall | SQL and Power BI

London, United Kingdom | Full right to work in the UK | shivsatyamsingh920@gmail.com

+44 7393 065593 | [Portfolio](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Business Analyst who came into the role through delivery, having owned requirements, vendor coordination and process improvement in an operations setting before moving into dedicated Business Analyst roles. Works to the point where something is live and used rather than signed off, so the same person who ran the elicitation also ran the UAT and wrote the guidance users work from. Builds working software with Claude Code and Codex, so a proposal can be demonstrated before development effort is committed. Available immediately, no notice period.

## SKILLS

**Business Analysis:** Requirements gathering and elicitation, BRD, FRD, user stories, acceptance criteria, use cases, requirements traceability, gap and impact analysis, As Is and To Be process mapping, business process improvement, stakeholder and vendor management, workshop facilitation.

**Delivery:** Agile, Scrum, sprint planning, backlog refinement, Waterfall, SDLC, UAT, test scenario design, defect triage, go live support, user training and documentation.

**Technical:** SQL, Microsoft SQL Server, Power BI, data validation, source to report reconciliation, KPI definition, API and MCP integration, SAP, Salesforce, Jira, Confluence, Visio, Lucidchart, Figma.

**AI Tooling:** Claude, Claude Code, Codex, Antigravity IDE, ChatGPT, Microsoft Copilot, custom GPT configuration, agent instruction files, subagent scoping, AI assisted prototyping.

## WORK EXPERIENCE

### Business Analyst (Contract) | Ckay Solution Limited, United Kingdom

May 2026 to August 2026

- Fixed term contract delivering a customer facing digital product from requirements to launch, finished August 2026. Mapped end to end customer journeys and defined the functional specification, user stories and acceptance criteria the development team built from, working inside an Agile team with product, development and QA.
- Designed a SQL reporting framework and Power BI dashboards, including one connected to SAP for an automotive components client and a churn analysis solution integrated with Salesforce for an insurance client, reconciling source data against reported figures.
- Built working prototypes with Claude Code and Codex ahead of formal specification, so stakeholders reacted to something clickable rather than a document, and established the workshop format that brought commercial and technical stakeholders to a single agreed direction.

### Career break | Full time MBA, Middlesex University, London

Jan 2025 to Feb 2026

### Business Analyst | FeelTech Digiviation Ltd, India

Dec 2023 to Dec 2024

- Led the replacement of a manual paper based process with a role based web and mobile platform across multiple educational institutions, from discovery to go live.
- Ran elicitation workshops with academic, administrative and leadership stakeholders whose priorities did not align, authored the BRDs, FRDs and process documentation, and maintained traceability through to test.
- Planned and executed UAT, managed defect triage and retest with the development team, and delivered the training and guidance that let institutions run the system independently after handover.

### Associate Manager, Operations | Jindal Stainless Ltd, India

Nov 2017 to Nov 2023

- Business and process owner for a Level 2 process automation implementation, defining functional requirements, coordinating the external vendor through configuration and validating system logic against live operational data to 94 to 98% prediction accuracy.
- Identified functional issues during simulation testing ahead of rollout, preventing downstream disruption, and authored the standard operating procedures and end user training that supported adoption.
- Coordinated procurement, delay forecasting and budget and timeline impact analysis on a large capital programme, and delivered process improvements assessed at over £1.5M in combined annual operating cost savings. Recognised with the Star Award (2021) and the Idea Champ Award.

### Executive, Operations | India Steel Works Ltd, India

Mar 2016 to Nov 2017

- Ran variance and benchmarking analysis and reported deviations to management.

## PROJECTS, BUILT WITH ANTIGRAVITY, CLAUDE CODE AND CODEX

- AI marketing platform delivered for a client, covering eight modules and an autonomous agent that takes a task in plain English, asks its own follow up questions, generates the content and publishes it to LinkedIn and X through secure OAuth. Next.js, TypeScript, PostgreSQL and Prisma, deployed on Vercel: [live app](#)
- Multi agent Python application: an orchestrator routes each task to the correct specialist workflow, an independent gate decides whether heavier workflows may execute at all, and a runtime owns session lifecycle with safety stops and no persisted state, tested by a suite asserting isolation and consent controls. Also an AI voice assistant MVP covering order lookup, complaint capture and case creation.
- Live analytics dashboard integrating a public API, rebuilt on every load rather than cached: [view dashboard](#). Browser tool turning structured inputs into a formatted document in real time: [view tool](#). UK general insurance portfolio and claims dashboard built in Power BI and SQL Server.

## EDUCATION AND CERTIFICATIONS

Master of Business Administration, Middlesex University, London, United Kingdom, February 2026. Awarded Merit.

Bachelor of Technology, Metallurgy and Material Engineering, National Institute of Technology Srinagar, India, 2015.

**Certifications:** Atlassian Agile Project Management. Business Analysis for Project Managers. Technology Consulting Virtual Case Experience (PwC, Forage). Business Analysis A to Z Masterclass. Microsoft Power Platform Fundamentals (PL-900), in progress.
