

Data Field List

Digital STEM Content Delivery Platform

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	Data Field List
Prepared By	Business Analyst
Version	1.0
Date	June 20xx

1. Document Purpose

This Data Field List defines the key data fields required for the Digital STEM Content Delivery Platform. It helps the Developer Team design screens, data storage and validation rules, and helps the QA Tester prepare data validation scenarios.

2. Document Inputs

This document uses inputs from the approved BRD, FRD, NFRD, Business Rules Document, Use Case Document, To-Be Process Flow and discovery notes.

3. Data Field Scope

The data fields cover user accounts, content records, content metadata, content status, approval details, filters and classroom display information. Student data is out of scope because Release 1 does not include student login, student portal or student progress tracking.

4. Data Entity Overview

Data Entity	Description	Used For
User Account	Stores user identity and role information for Admin Staff, Teacher and Principal / Approval Owner.	Login and role-based access
Content Record	Stores learning content details such as title, class, subject, topic, type and file/link.	Admin content management and Teacher library
Content Status	Controls Draft, Under Review, Approved and Inactive status.	Approval workflow and Teacher visibility
Approval Details	Stores approver, approval date and review comments.	Content review and approval

5. Data Field List

Field ID	Data Field	Description	Used In	Data Type	Mandatory	Owner	Validation / Notes
DF-01	User ID	Unique system-generated user identifier	Login / user account	System generated	Yes	System	Must be unique.
DF-02	Full Name	Name of the user	User account	Text	Yes	Admin / System	Required for user identification.
DF-03	Email / Username	Login username or email address	Login	Text / Email	Yes	Admin / System	Must be unique.
DF-04	User Role	Role assigned to user	Role-based access	Dropdown	Yes	Admin / Product Owner	Allowed values: Admin Staff, Teacher, Principal / Approval Owner, Subject Teacher / SME.

DF-05	Account Status	Whether user account is active or inactive	Login access	Dropdown	Yes	Admin / System	Inactive users should not access the platform.
DF-06	Content ID	Unique system-generated content identifier	Content record	System generated	Yes	System	Must be unique for each content item.
DF-07	Content Title	Name of the learning content	Content management / Teacher library	Text	Yes	Admin Staff	Should clearly describe the topic.
DF-08	Class	Class or grade level for the content	Content metadata / filter	Dropdown	Yes	Admin Staff	Required before submit for review.
DF-09	Subject	Subject linked to the content	Content metadata / filter	Dropdown	Yes	Admin Staff	Example: Physics, Chemistry, Mathematics, Computer Science.
DF-10	Topic	Specific topic covered by the content	Content metadata / filter	Text / Dropdown	Yes	Admin Staff	Example: H2O molecule, loops, 3D geometry.
DF-11	Content Type	Type of learning content	Content metadata / filter	Dropdown	Yes	Admin Staff	Allowed values: 3D video, animated video, coding simulation, visual explanation, interactive web content.
DF-12	Learning Objective	What the content should help the Teacher explain	Content details / approval	Long text	Yes	Admin Staff / Subject Teacher	Required before submit for review.
DF-13	Content Description	Short description of the content	Content details	Long text	No	Admin Staff	Useful for Teacher understanding.
DF-14	File or Link	Content file path or URL	Content launch	URL / File reference	Yes	Admin Staff / Content Team	Required before classroom launch.

DF-15	Duration	Estimated content duration	Content details	Number / Text	No	Content Team / Admin	Recommended for video and animation.
DF-16	Labels Required	Visual labels required in the learning content	Content review	Long text	No	Subject Teacher / Content Team	Useful for content validation.
DF-17	Content Status	Current workflow status	Approval workflow	Dropdown	Yes	System / Admin / Approver	Allowed values: Draft, Under Review, Approved, Inactive.
DF-18	Approval Owner	Person or role responsible for approval	Approval workflow	User / Role lookup	Yes	Product Owner / Admin	Required before approval routing.
DF-19	Review Comments	Comments from reviewer	Approval workflow	Long text	No	Reviewer	Required when content is sent back for correction.
DF-20	Approved By	User who approved content	Approval record	User lookup	Conditional	System / Approver	Required when status becomes Approved.
DF-21	Approved Date	Date and time of approval	Approval record	Date/time	Conditional	System	Required when status becomes Approved.
DF-22	Inactive Reason	Reason for marking content inactive	Content status	Long text	Conditional	Admin / Approval Owner	Required when content is marked Inactive.
DF-23	Created By	User who created the content record	Audit / record tracking	User lookup	Yes	System	Auto captured by system.
DF-24	Created Date	Date and time content record was created	Audit / record tracking	Date/time	Yes	System	Auto captured by system.
DF-25	Last Updated Date	Date and time content record was last updated	Audit / record tracking	Date/time	Yes	System	Auto captured by system.

DF-26	Search Keyword	Keyword entered by Teacher	Teacher library search	Text	No	Teacher	Can be optional for Release 1 if filters are primary.
-------	----------------	----------------------------	------------------------	------	----	---------	---

6. Data Validation Rules

Rule ID	Validation Rule
VR-01	Content Title, Class, Subject, Topic, Content Type and Status are mandatory for content records.
VR-02	Draft content can be saved with basic metadata, but cannot be submitted for review until mandatory metadata is complete.
VR-03	File or Link must be available before content can be launched in classroom display mode.
VR-04	Only Approved content should be visible in Teacher library.
VR-05	Draft, Under Review and Inactive content must not be visible to Teachers.
VR-06	Approved By and Approved Date must be captured when content status changes to Approved.
VR-07	Review Comments should be captured when content is sent back for correction.
VR-08	Inactive Reason should be captured when content is marked Inactive.

7. Field Visibility by Role

Role	Fields / Information Visible
Teacher	Content Title, Class, Subject, Topic, Content Type, Learning Objective, File or Link for launch, Approved content only
Admin Staff	All content metadata fields, status, file/link, created and updated details
Principal / Approval Owner	Content details, status, approval owner, review comments and approval fields
Subject Teacher / SME	Content details, learning objective, labels required, file/link and review comments
System	Content ID, User ID, created date, updated date, approval date and visibility control

8. Teacher Library Filter Fields

Filter Field	Purpose
Class Filter	Filters approved content by class or grade level.
Subject Filter	Filters approved content by subject.
Topic Filter	Filters approved content by topic.
Content Type Filter	Optional filter for 3D video, animated video, coding simulation, visual explanation and interactive web content.
Search Keyword	Optional keyword search for content title or topic.

9. Content Status and Visibility

Status	Visible to Teacher?	Rule
Draft	No	Admin can edit and submit for review.
Under Review	No	Reviewer can approve or send back for correction.
Approved	Yes	Teacher can search, filter and launch content.
Inactive	No	Content remains hidden from Teacher library.

10. Assumptions

- Final database design will be handled by the Developer Team.
- Field names may be refined during UI/UX design and technical design.
- Sample content data will be provided by the Content Team for testing.
- No student-specific data fields are required for Release 1.
- Role permission details will be expanded in the Role and Permission Matrix.

11. Next Step

After the Data Field List is reviewed, the Business Analyst will prepare the Role and Permission Matrix to define what each user role can view, create, edit, approve and launch.
