

To-Be Business Flow

Digital STEM Content Delivery Platform

Project Details

Field	Details
Project Name	Digital STEM Content Delivery Platform
Client	ABC School
Document Type	To-Be Business Flow
Prepared By	Shiv Satyam Singh
Version	1.0
Date	28 June 2026

Document Purpose

This document explains the future process for ABC School after implementing the Digital STEM Content Delivery Platform. It shows how Admin Staff will manage learning content, how approval will work, and how Teachers will access approved STEM and Coding content for classroom display.

Future Process Summary

ABC School will use a teacher-led web platform where Teachers can log in, view approved STEM and Coding learning content, filter content by class, subject and topic, open selected content and display it on a classroom screen, projector or smart board.

Admin Staff will manage content records. Subject Teachers, Subject Matter Expert or Principal will review and approve learning content before it becomes visible to Teachers.

Diagram Overview

- Figure 1 shows the future Admin content management and approval flow.
- Figure 2 shows the future Teacher content access and classroom display flow.
- The future process removes manual approval confusion by using content statuses: Draft, Under Review, Approved and Inactive.

To-Be Business Flow

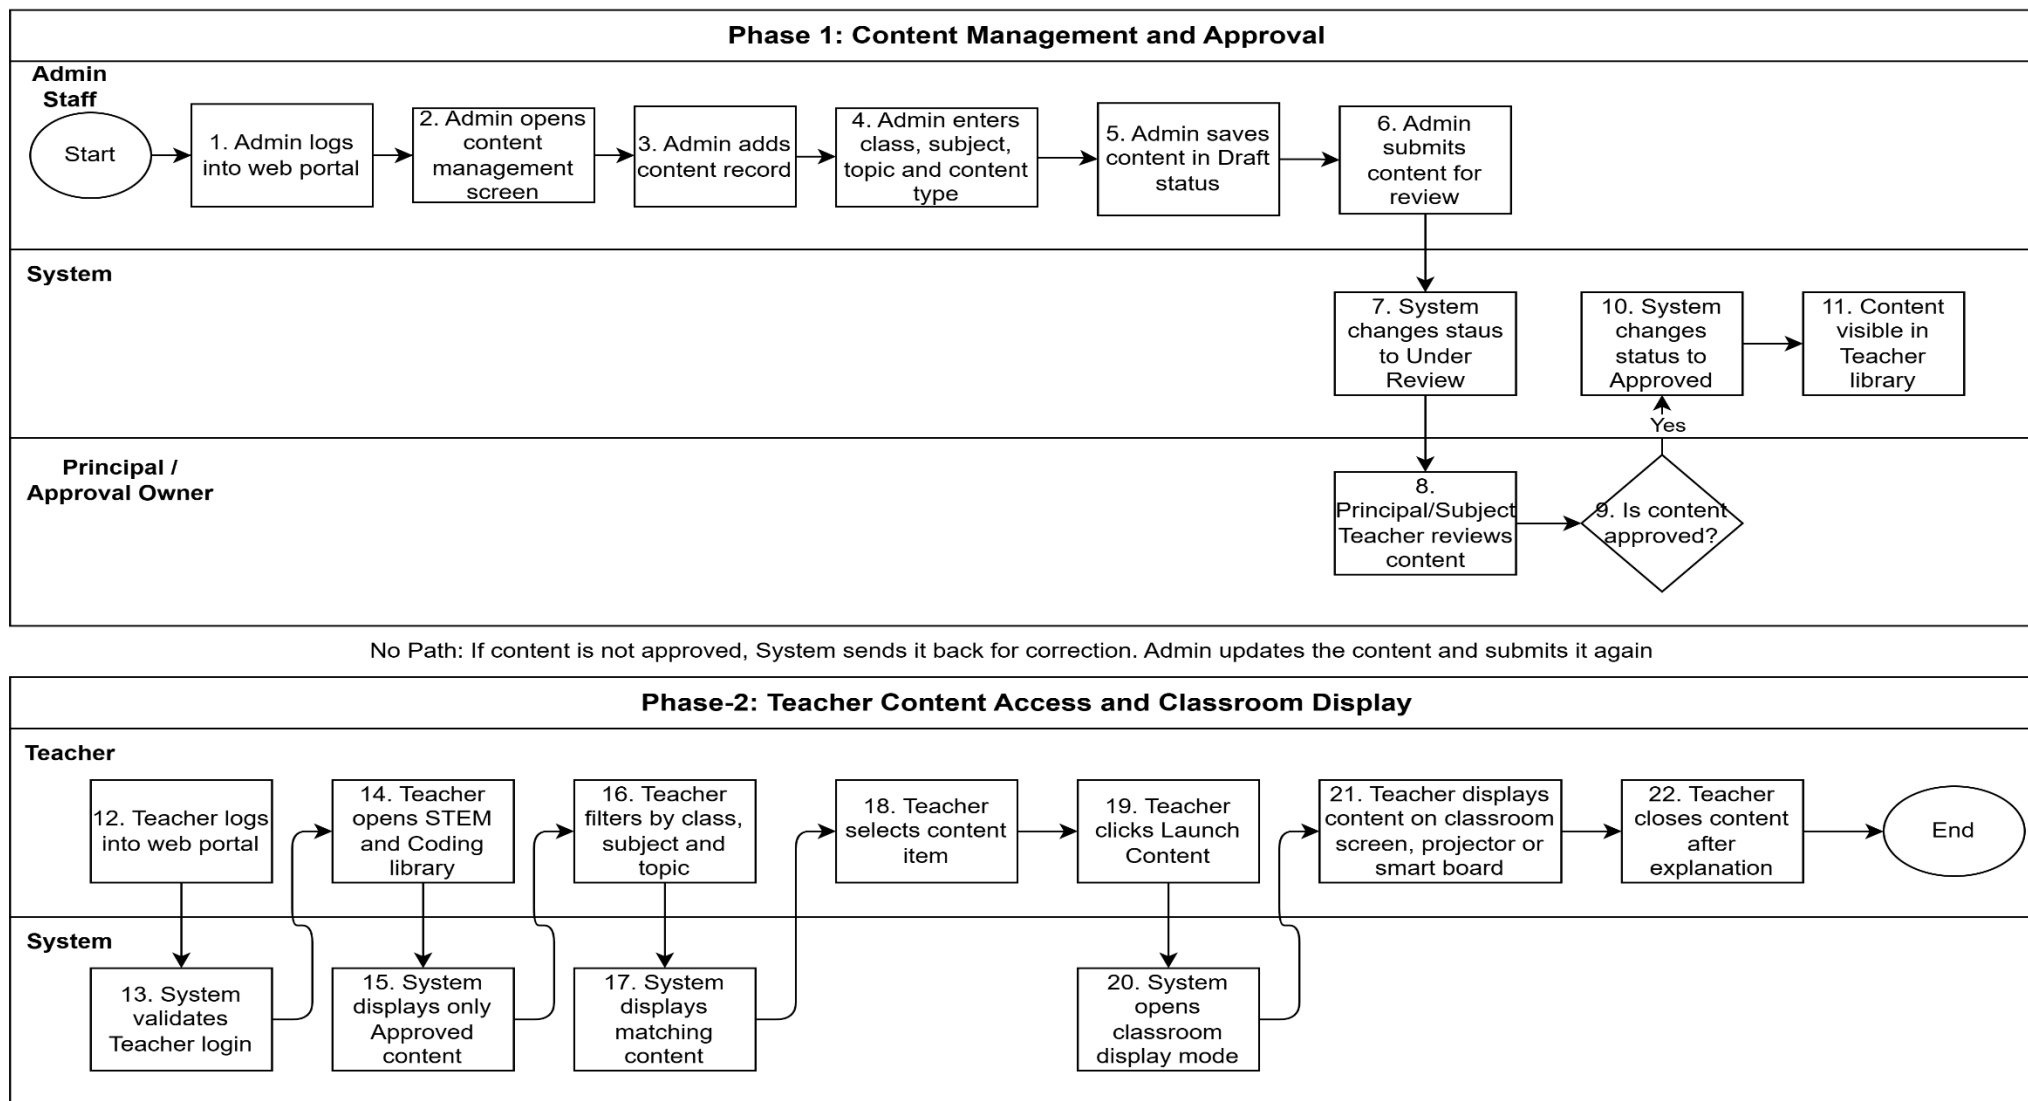

Figure 1: To-Be Process Flow for Digital STEM Content Delivery Platform

Teacher Content Access Flow

Step	Future Activity	Role Involved	Expected System Behaviour
1	Teacher opens web portal	Teacher	System displays login page
2	Teacher enters login details	Teacher	System validates user credentials
3	Teacher lands on dashboard	Teacher	System shows STEM and Coding content library option
4	Teacher opens content library	Teacher	System displays only Approved content
5	Teacher filters content by class, subject and topic	Teacher	System displays matching approved content
6	Teacher selects content item	Teacher	System opens content details
7	Teacher clicks Launch Content	Teacher	System opens classroom display mode
8	Teacher shows content on classroom screen, projector or smart board	Teacher	System displays clean classroom view
9	Teacher closes content after explanation	Teacher	System returns Teacher to content library

Admin Content Management Flow

Step	Future Activity	Role Involved	Expected System Behaviour
1	Admin logs in to web portal	Admin Staff	System validates Admin role
2	Admin opens content management screen	Admin Staff	System displays content list
3	Admin adds new content record	Admin Staff	System captures content details
4	Admin enters class, subject, topic and content type	Admin Staff	System stores structured content metadata

5	Admin adds learning objective, labels, duration and file/link details	Admin Staff	System saves content information
6	Admin saves content in Draft status	Admin Staff	Content remains hidden from Teachers
7	Admin moves content to Under Review	Admin Staff	Content becomes available for review
8	Approved content becomes visible to Teachers	System	Content appears in Teacher library
9	Inactive content is hidden from Teachers	System	Content is not available for classroom use

Content Approval Flow

Step	Future Activity	Role Involved	Expected System Behaviour
1	Content record is created in Draft status	Admin Staff	Content is not visible to Teachers
2	Admin submits content for review	Admin Staff	Status changes to Under Review
3	Subject Teacher or Subject Matter Expert reviews academic accuracy	Subject Teacher / SME	Reviewer checks learning objective, topic, labels and content accuracy
4	Principal or authorised Subject Teacher approves content	Principal / Subject Teacher	Status changes to Approved
5	Approved content becomes visible in Teacher library	System	Teacher can search, filter and launch content
6	Content can be marked Inactive if not suitable	Admin / Principal	Content is hidden from Teachers

Key Improvements

Improvement ID	Improvement
I01	Teachers will use a dedicated web portal
I02	STEM and Coding content will be organised in a structured library

I03	Teachers can filter content by class, subject and topic
I04	Only approved content will be visible to Teachers
I05	Admin can manage content records properly
I06	Content status workflow will be clear
I07	Subject Teacher or Principal approval will be recorded
I08	Classroom display mode will support projector and smart board usage

Business Rules

1. Teacher must log in before accessing learning content.
2. Teacher can view only Approved content.
3. Draft content must not be visible to Teacher.
4. Under Review content must not be visible to Teacher.
5. Inactive content must not be visible to Teacher.
6. Admin can create and update content records.
7. Content must have class, subject, topic and content type.
8. Principal or authorised Subject Teacher can approve content.
9. Classroom display mode must hide unnecessary admin controls.
10. Role based access must control Teacher, Admin and Principal actions.

Next Step

Prepare Business Requirements Document based on discovery notes, As-Is Process Flow and To-Be Process Flow.
