

Stakeholder Register and Discovery Questions

Project Name

ABC School Web and Mobile Application

Prepared By

Shiv Satyam Singh, Business Analyst

Sprint

Sprint 0: Discovery and Setup

1. Stakeholder Register

Stakeholder Name / Role	Organisation	Project Role	Interest in Project	Priority	Communication Method
School Owner	ABC School	Business Sponsor	Wants the application to improve school operations	High	Discovery meeting / approval meeting
Principal	ABC School	Product Owner	Provides business priorities and approves requirements	High	Meetings / Confluence review
Admin Staff	ABC School	Key User	Will manage student data, teacher data and attendance reports	High	Requirement meeting / UAT session
Teacher Representative	ABC School	Key User	Will use the mobile app to mark and submit attendance	High	Requirement meeting / UAT session
Scrum Master	Delivery Team	Facilitator	Manages Agile ceremonies and removes process confusion	Medium	Jira / team meetings
Trainee Business Analyst	Delivery Team	Requirement Owner	Documents requirements, user stories and acceptance criteria	High	Jira / Confluence / meetings

Developer	Delivery Team	Technical Delivery	Builds web and mobile application features	Medium	Jira / sprint ceremonies
Quality Assurance Tester	Delivery Team	Testing	Reviews test scenarios and validates functionality	Medium	Jira / test review meeting
DevOps Engineer	Delivery Team	Deployment Support	Supports environment setup and release activities	Low	Jira / release meeting

2. Discovery Questions

A. Business Objective Questions

1. What is the main reason ABC School wants this application?
2. What problem are you facing with the current attendance process?
3. Who will approve the final requirements from ABC School side?
4. Is the first version focused only on attendance and basic admin work?
5. What result will make this project successful for ABC School?

B. Current Attendance Process Questions

1. How do teachers currently mark attendance?
2. Is attendance currently recorded on paper, Excel or any existing system?
3. How many classes are there in the school?
4. How many students are usually in one class?
5. Who checks attendance after teachers submit it?

C. Teacher Mobile App Questions

1. Should teachers log in using username and password?
2. Should teachers see only their assigned class?
3. What attendance options should be available? Example: Present, Absent.
4. Should the teacher review attendance before submitting?
5. After submission, should the teacher be able to edit attendance?

D. Admin Web Application Questions

1. Who from the admin team will use the web application?
2. What student details does admin need to add?
3. What teacher details does admin need to add?
4. Should admin be able to update student and teacher records?
5. Should admin view attendance by class, date and student?

E. Role-Based Access Questions

1. What should Admin be allowed to access?
2. What should Teacher be allowed to access?
3. Should teachers be blocked from admin screens?
4. Should admin be able to view all attendance records?
5. Should each user have a unique login?

F. Reporting Questions

1. What basic attendance reports are needed?
2. Should reports be filtered by class?
3. Should reports be filtered by date?
4. Should reports show individual student attendance?
5. Should reports be downloadable in Project 1, or only viewable on screen?

G. Out-of-Scope Confirmation Questions

1. Can we confirm fee management is out of scope for Project 1?
 2. Can we confirm transport management is out of scope?
 3. Can we confirm exam marks are out of scope?
 4. Can we confirm parent login is out of scope?
 5. Can we confirm payment gateway and notifications are out of scope?
